Acknowledgement

This thesis is the result of constant hard work whereby I have been accompanied and supported by many people. It is my great pleasure to acknowledge and express my regards to all of them.

I am deeply indebted to my supervisor professor Dr. V.K. Gupta, Kurukshetra University, Kurukshetra for his valuable suggestions, limitless patience, constant encouragement and constructive criticism without which this thesis would not have been possible.

I am really fortunate to have worked under my Co-supervisor Dr. Rekha Kansal (Principle Scientist), NRCPB, IARI, Delhi who was ever willing to help and guide. Her friendly manner and patient attitude were very encouraging and inspiring.

I express my sincere thanks to Dr. N. N. Dogra, Chairperson and all other teachers of Department of Biochemistry, Kurukshetra University, Kurukshetra for their help extended during the entire period of Ph.D. Program.

I express my special thanks to entire non teaching staff of the Department of Biochemistry for their full cooperation during research.

Financial assistance provided by DST in the form of INSPIRE fellowship is greatly acknowledged.

I would like to express my sincere thanks to my lab members for their support and cooperation.

Finally, I take this opportunity to take one and all that have directly or indirectly helped me in completing this task. Though many have not been mentioned, none are forgotten.

Last but not the least, I would like to express my deep sense of regard to my father Sh. Dharam Pal Mittal, mother Smt. Madhu Bala Mittal, elder brother Dr. Chander Mohan Mittal and Bhabhi Dr. Ruchika Mittal who formed part of my vision and for their cherished support in every way with constant encouragement over the years. They have been extremely supportive and caring towards me.

I must thank the Almighty God for giving me the strength and opportunity to do the present work.

June 2014

(Anuradha Mittal)
