ACKNOWLEDGEMENT

It has been a long journey for me to complete my dissertation and subsequent Ph.D. degree. Life keeps changing and is never waiting for you to find time to manage it. Much has happened and changed during the time that I have been involved with this project. Looking back, I could not have succeeded without all kinds of support and assistance from many peoples in many ways.

My first and most earnest acknowledgement must go to my honorable guide Dr. Rajesh K. Parikh, Head, Department of Pharmaceutics and Pharmaceutical Technology, L. M. College of Pharmacy. It is my profound pleasure to work under this great personality who has brought about a better me in myself. During the past five years, his care, support, patience and flexibility enabled me to achieve this step of my life. He always provides me the motivation, encouragement, insight, advice and direction right up to the end. His truly scientist intuition has made him a constant oasis of ideas and passions in science, which exceptionally inspired and enriched my growth as a researcher. I thank immensely for his patient hearing of my work and for the constructive comments, valuable suggestions and feedback given to me up to the last stages of my research work. He has never judged nor pushed when he knew I needed to juggle my priorities. There is no way I could possibly have accomplished this research without his guidance, encouragement, and support. There are no words that can express my gratitude and appreciation for all he has done for me.

I would like to express my heartfelt appreciation to Dr. D. R. Shah Vice Chancellor, Uka Tarsadia University, Bardoli and to the ‘Management, Bardoli Pradesh Kelvani Mandal’ (BPKM), for providing their considerate support, motivation, encouragement and facilities to me, throughout the tenure of my research work. I also, sincerely thank, Dr. S. A. Shah PG Head and Dr. Abhay Dharamsi HOD, Dept. of Pharmaceutics for their kind words of appreciation, inspiration and for sheer scholastic presence that is motivating enough to work harder.

I am very much thankful to one of my very close friend and co-worker for this research work Mr. Ketan M. Ranch. It’s a very long journey together since college days and I have always learned so much from you. I thank you not only for always being a inspiration, best friend, moral support but also for the critical help during my research work. I also remember at this point the efforts made by you to initialize my doctorate research under guidance of Dr. R.K.Parikh Sir. This entire journey of research would not have been possible without you.
My special thanks go to Dr. Adhvait Dixit (Executive; Dr. Reddy’s Laboratory-Hyderabad) and Mr. Furqan Maulvi firstly, for warm, supporting and genuine friendship that is one of the best and out of this world. I thank you both for helping me to procure the important excipients and to carry out some indispensable analytical work including dynamic surface tension and DSC studies.

I would also like to thank all my teachers who were responsible for my academic development as well, teaching courses focused around their unique research expertise.

I owe a lot of thanks to my friends Dr. Gajanan kalyankar, Dr. Bhavin Vyas and Dr. Pranav Shah. I really appreciate their ever cheerful and friendly demeanour on my frequent queries, ample conversations and interactions for the concerned work, which has truly enriched my knowledge in Chemistry, Pharmacology and NDDS respectively.

I express my gratitude to Mr. Bhavin Marolia, Mr. Kunjan Bodiwala and Mr. Bhavik Satani for enabling me to carry out essential analytical work, especially FTIR, DSC, HPLC and UV Spectroscopic work utilized in the present study. I am also very much thankful to Mr. Vilas Surana for his help during microscopical studies for my research work.

I am also very much thankful to Dr. Ashish Mishra and Dr. Renu Chauhan for always motivating, guiding and supporting me during this long time.

My heartfelt thanks go in particular to my friends Dr. Sandesh Lodha and Dr. Shrikant Joshi for their priceless friendships, warmth and continuous motivation and support during this work.

I am heartily obliged to my dear friends and colleagues in line of work Paras Patel, Sonia Pandey, Ritesh Shah, Pintu Prajapati, Hetal Patel, Payal Shah, Arti Gupta and Dr. Sanjay Tiwari for their patience, continuous support and motivation to pursue my doctorate research studies.

I want to convey my deepest appreciation to all library staff and lab technicians and Peons at Maliba Pharmacy College, Bardoli for providing the critical help related to research and academics activities. I am also thankful to Jayesh, Maulik and Harish for their help during my studies.
I am extremely thankful to M.S. University, Centre for surface science and nanotechnology DDIT, and Sun Pharma Advanced Research Centre for providing me facility for particle size analysis, DSC and Dynamic surface tension measurement.

I would like to give my tremendous heartfelt thanks to my family for always being there without complaining when I needed them. I am ever indebted to my parents who deserve a special mention for their indissoluble support and prayers. They are the first persons to inspire me for doctoral studies. I cannot thank them enough for all the care, love and sacrifices. Words fail me to express my appreciation to my wife Dipa whose dedicated love, patience and unrelenting confidence in me never has deprived during the difficult times. I am also thankful to my sisters Parmita and Archana for their kind support during my studies.

Before I sum up, I offer my regards and blessings to all of those people who supported me and offered me their gracious help in any respect during the completion of this research work; with my sincere apology, if I was not being able to mention them all individually. At last but not least, my unlimited thanks to the Almighty for his blessing to bring forth my internal positive energy to cherish my work.

Akshay R. Koli
