ACKNOWLEDGEMENTS

At the very outset, I would like to express my sincere gratitude to my Supervisor, Prof. Mirza S. Saiyadain, who in spite of his busy schedule, supervised my work thoroughly and rendered his valuable as well as scholastic suggestions. He always showed me the utmost kindness and concern. In fact, without his guidance and encouragement this work could not have been completed.

I am highly grateful to Prof. Ishwar Dayal, Late Mr. R.K. Shrivastava and Dr. Reena Ramachandran who were very encouraging and supportive throughout the PhD process. I would also like to thank in particular, Dr. Tariq Ashraf for furnishing me with useful information and data. Another person who definitely needs special mention is Shimail who has many a times gone out of his way to help me out.

I cannot afford to forget to thank my family- in particular, my grandfather, parents and uncle who were a source of inspiration throughout my research project. They provided me the strength as well as courage to overcome the obstacles that came on the way of this endeavour. Besides, I would like to thank my friends, Neelam, Bhawna Sharma and Shivani Kapoor who have always proved to be "friends in need". Many of my colleagues, in particular,
Swati Singh, Parul Singh, Arun Kumar, Kamal Negi, Barnali Chaklader and Dr. S. Panda have extended their help at various levels of completion of this work.

A number of people have contributed directly and indirectly in my research. I am grateful to each and everyone for their support.

LUBNA NAFEES
