# Contents

**Synopsis**  
xxv-xxvii  

**List of Figures**  
xxviii-xxxvi  

**List of Tables**  
xxxvii-xxxviii  

**Chapter 1**  
Introduction, Objectives and Work Plan of Present Study  

1.1 Introduction  
1.2 Objectives  
1.3 Work Plan  
1.4 Summary  
1.5 References  

1.1-1.8  

**Chapter 2**  
Literature Survey  

2.1 Introduction  
2.2 Phase diagram and crystal structure  
2.3 Processing, microstructure and properties of bulk TiB$_2$  
2.3.1 Synthesis of TiB$_2$  
2.3.2 Densification and microstructure of monolithic TiB$_2$  
2.3.3 Effect of metallic sinter additives  
2.3.4 Effect of non-metallic sinter additives  
2.4 High temperature oxidation behavior  
2.5 Applications of bulk TiB$_2$ materials  
2.6 Literature on sintering aids used in the present study  

2.1-2.46
Chapter 3

Experimental Procedure

3.1 Introduction

3.2 Equipments & Instruments

3.3 Materials

3.3.1 Titanium diboride (TiB$_2$)

3.3.2 Molybdenum Silicide

3.3.3 Chromium diboride

3.3.4 Pre-alloyed titanium and chromium diboride [(TiCr)B$_2$]

3.4 Processing and Microstructure

3.4.1 Hot Pressing

3.4.2 Pressureless sintering

3.4.3 Characterization

3.5 Oxidation studies

3.5.1 Materials

3.5.2 Experimental procedure

3.5.3 Characterization of oxidized samples

3.6 Summary

3.7 References

Chapter 4

Synthesis of starting Powders
5.3.4 TiB$_2$ + CrB$_2$ composites 5.27
5.3.5 TiB$_2$ + 20%MoSi$_2$ + CrB$_2$ composites 5.28
5.3.6 (TiCr)B$_2$+20%MoSi$_2$ composites 5.30
5.4 Mechanical and Physical Properties 5.34
5.4.1 TiB$_2$+TiSi$_2$ composites 5.34
5.4.2 TiB$_2$ + CrSi$_2$ composites 5.38
5.4.3 TiB$_2$ + WSi$_2$ composites 5.40
5.4.4 TiB$_2$ + CrB$_2$ composites 5.42
5.4.5 TiB$_2$ + 20%MoSi$_2$ + CrB$_2$ composites 5.44
5.4.6 (TiCr)B$_2$+20%MoSi$_2$ composites 5.47
5.5 Discussion on Results of densification studies 5.51
5.5.1 Densification of TiB$_2$ with TiSi$_2$ additions 5.53
5.5.2 Densification of TiB$_2$ with CrSi$_2$ additions 5.55
5.5.3 Densification of TiB$_2$ with WSi$_2$ additions 5.56
5.5.4 Densification of TiB$_2$ with CrB$_2$ additions 5.58
5.5.5 Densification of TiB$_2$ with combined additions of CrB$_2$ and MoSi$_2$ 5.59
5.5.6 Densification of (TiCr)B$_2$+20%MoSi$_2$ 5.61
5.6 Summary 5.64
5.7 References 5.68

Chapter 6 6.1-6.82

Oxidation Studies

6.1 Introduction 6.1
6.2 Continuous oxidation (non-isothermal) 6.2
6.3 Isothermal oxidation

6.3.1 Oxidation studies of TiB$_2$+TiSi$_2$ composites

6.3.2 Oxidation studies of TiB$_2$ + CrSi$_2$ composites

6.3.3 Oxidation studies of TiB$_2$ + WSi$_2$ composites

6.3.4 Oxidation studies of TiB$_2$ + CrB$_2$ composites

6.3.5 Oxidation studies of TiB$_2$ + 20%MoSi$_2$ + CrB$_2$ composites

6.3.6 Oxidation studies of (TiCr)B$_2$+20%MoSi$_2$ composites

6.4 Discussion on results of oxidation studies

6.4.1 Effect of TiSi$_2$ addition on oxidation behavior of TiB$_2$

6.4.2 Role of CrSi$_2$ addition on oxidation behavior of TiB$_2$

6.4.3 Influence of WSi$_2$ addition on oxidation behavior of TiB$_2$

6.4.4 CrB$_2$ role in the oxidation behavior of TiB$_2$ composites

6.4.5 Effect of combined addition of CrB$_2$ and MoSi$_2$

6.4.6 Oxidation studies of (TiCr)B$_2$ +20%MoSi$_2$ composites

6.5 Conclusions

6.6 References

Chapter 7 7.1-7.6

Summary and Scope for Future Work

7.1 Summary of the present work

7.2 Scope for future work
