ACKNOWLEDGMENT

At the end of my thesis, it is a pleasant task to express my thanks to all those who contributed in many ways to the success of this study and made it an unforgettable experience for me.

At this moment of accomplishment, foremost, I would like to express my sincere gratitude to my project guide Dr. S. A. Channiwala for his immense guidance, motivation, enthusiasm, and patience throughout the project work. His guidance helped me in all the time of research and writing of this thesis. Dr. S. A. Channiwala, Professor in Mech. Engg. Dept. S.V.N.I.T., Surat, is an esteemed personality in the field of mechanical engineering. Whenever I visited him, I found my difficulties got vanished by his prompt solutions. I am indebted to him for his valuable guidance and efficacious navigation. He brought me closer to the reality I had initially perceived, eventually enabling me to grasp its rich complexity. His comments on chapter drafts are themselves a course in critical thought upon which I will always draw. His capacity to combine critique with an immediate empathy and commitment towards others engaged in struggle will always inspire me. I could not have imagined having a better advisor and mentor for my Ph.D study. His unflinching courage and conviction will always inspire me.

I will always remain thankful to Sarvajanik College of Engineering and Technology management, Er. Kashyapbhai Mehta and Dr. K. N. Mistry, Principal at Sarvajanik College of Engineering and Technology, Surat, for their generous permission to this study and for providing necessary infrastructure and resources to accomplish my research work when ever required. I am also thankful to Prof. Persi Engineer for his continuous inspiration and providing cordial atmosphere to work.

I am very much grateful to Dr. P. D. Pore, Director- SVNIT, Dr. B. K. Murli, Prof. S. P. Dubey, Dr. H. K. Raval, Dr. R. Venkata Rao, Dr. D. V. Bhatt and other respectable senior faculty members of Mech. Engg. Dept., SVNIT. They have given me valuable support and guidance. My special thanks to Prof. Beena Baloni, SVNIT, for her precious guidance to analyze CFD results.

I take this opportunity to say hearty thanks to Prof. Pankaj Gohil, Prof. Rajesh Darji, Prof. Mahesh Trivedi, Mr. Amit Maheta and Ms. Bhumi Shah of SCET, who
willingly devoted so much time to help me. Their energetic and tireless support during the write-up stage cleared the path towards thesis completion.

I would like to express my hearty thanks to Mr. K. J. Panchal, Mr. I. D. Prajapati and Mr. D. V. Kadam of SCET mechanical department. They have carried out the fabrication work with keen interest and practical approach. I would also like to express my thanks to Mr. Balvant Patel and Mr. Jayesh Jadav. They helped me a lot during extensive project work.

The road to my Ph.D started with working as co-guide to many M. E./M.Tech students, namely Mr. C. C. Patel, Dr. Deepak Sharma, Ms. Kinnari Shah, Mr. T. Balaganeshan, Mr. Anil Dube, Mr. Suhas Masutage, Mr. Viral Patel and many more. At this stage I would like to thank all those students whose keen interest and work have contributed a lot to this enormous work. I have received their lots of help to sail this ocean of study.

I owe gratitude to my parents and family members for their unconditional support. They were always supporting me and encouraging me with their best wishes. I would like to acknowledge the great help received from my wife, Malini, for the preparation of thesis report. She was always there cheering me up and stood by me through the good and bad times. My dream has come true at this moment due to her inspiration and valuable assistance provided.

My special thanks to Dr. Rehana Chhaniwala for her warm welcome and moral support. She was always there to offer quiet encouragement by her own extraordinary kindness.

This topic of study is directly involved with the industries and it requires enormous help and data from the manufacturers. I remain always indebted to M/s Shah compressors, M/s Engineering models and equipments, Batliboy & Co. Ltd., Patel AirTemp Co. and C doctor & Co. Ltd. Their help has become indeed good pillars of present study. I am also thankful to Mr. Gaurang Parvadia, who has worked as my ready recknor for fan design.

At last, but not the least, I am very much thankful to all my seniors, friends and colleagues at SVNIT and SCET for their precious help to achieve this goal.

Besides this, several people have knowingly and unknowingly helped me in the successful completion of this project. I thank all of them here.

Nitin Vibhakar
