ACKNOWLEDGEMENTS

I consider it as my privilege to express a deep sense of gratitude and indebtedness to Dr. G. P. Mishra, M.Sc., Ph.D., F.I.T.E., Reader in Botany, University of Saugar, for his worthy guidance and sustained interest throughout the course of present investigations. His kind supervision was always freely and readily available to me which led to the completion of this work.

I take immense pleasure in recording my sincere gratitude to Prof. S. B. Saksena, F.N.A., Head of the Department and Dean, Faculty of Life Sciences, for providing laboratory facilities and constant encouragement.

My thanks are also due to Dr. R. N. Dakwale, M.Sc., Ph.D., Assistant Prof. of Botany, University of Saugar, Sagar, for valuable suggestions, and to all my friends and colleagues who have helped me in various ways.

To U.G.C., New Delhi, I am grateful for providing financial assistance in the form of Junior Research Fellowship.

( A. K. Nayak )
