Chapter 3  4-Substituted Isoquinoline-1,3-diones  
(Michael addition, Knoevenagel condensation)  52

3.1 Introduction  52

3.1.1 Michael Addition in Green Reaction Media  53

3.2 Literature Review  55

3.2.1 Michael Addition  55

3.2.2 Knoevenagel Condensation  65

3.3 Present Work: Results and Discussion  69

3.3.1 Michael Addition  70

3.3.2 Knoevenagel Condensation  78

3.4 Experimental Section  82

3.4.1 Methods and Materials  82

3.4.1.1 General Procedure for the Synthesis of 
Substituted 4-(3-oxo-1,3-diphenylpropyl)-2-phenyl 
isoquinoline-1,3(2H,4H)-dione 216 (a-m)  83

3.4.2 General Procedure for the Synthesis of Substituted 
4-((2-chloroquinolin-3-yl)methylene)-2-phenyl 
isoquinoline-1,3(2H,4H)-dione 217 (a-n)  89

3.5 Conclusion  97

Chapter 4 Water Mediated Catalyst Free Efficient Domino Synthesis  
of 3,4,6,7-tetrahydro-9-(1,2-dihydro-2-oxoquinolin-3-yl)-2H- 
xanthene-1,8(5H,9H)-dione Derivatives Using Parallel 
Synthesizer  98

4.1 Introduction  98

4.1.1 Importance of Xanthenediones  100

4.2 Literature Background  104

4.3 Present Work: Results and Discussion  107

4.3.1 Chemistry of Quinolinonyl Xanthene-1,8-Diones  110
4.4 Experimental Section

4.4.1 Methods and Materials

4.4.1.1 General Synthesis of 3,4,6,7-tetrahydro-9-(1,2-dihydro-2-oxoquinolin-3-yl)-2H-xanthene-1,8(5H,9H)-dione 251 (a-r)

4.5 Conclusion

Chapter 5 Antibacterial, Antifungal and Antioxidant Studies for the Synthesized Compounds

5.1 Antimicrobial Activity

5.1.1 Protocol for Antimicrobial Activity (Antibacterial and Antifungal) Agar Well Diffusion Method

5.1.2 Screening of Antibacterial Assay

5.1.2.1 Bis-isoquinolinones 127 (a-e)

5.1.2.2 Isoquinolin-1,3-diones 109 (a-h)

5.1.2.3 4-(3-oxo-1,3-diphenylpropyl)-2-phenylisoquinoline-1,3(2H,4H)-dione 216 (a-m)

5.1.2.4 4-((2-chloroquinolin-3-yl)methylene)isoquinoline-1,3(2H,4H)-dione 217 (a-m)

5.1.3 Screening of Antifungal Activity

5.2 Antioxidant Activity

5.2.1 Procedure for DPPH Method

5.2.2 Screening of Potential Antioxidants

5.3 Conclusion

OVERALL CONCLUSION OF THE THESIS

FUTURE WORK

Appendices

GENERAL REMARKS

1H NMR, 13C NMR and Mass spectra of the selected compounds
