CONTENTS

CHAPTER-1 INTRODUCTORY CONCEPTS AND REVIEW OF LITERATURE 1-26

1.1 Acceptance Sampling and related concepts 1
1.2 Mood’s theorem and its importance 3
1.3 Types of Sampling plans 4
1.4 The Single Sampling Plan and its ramifications 5
1.5 The Operating Characteristic (OC) function 6
1.6 Double and Multiple Sampling plans 10
1.7 Continuous Sampling Plans (CSP) 11
1.8 Algorithms for designing a Single Sampling Plan 12
1.9 Computer Programs for Sampling Plans 15
1.10 Skip-lot Sampling Plan (SkSP) 16
1.11 Inspection Errors and their influence on sampling plans 18
1.12 Review of some recent results 23
1.13 Focus of the thesis and layout 25

CHAPTER-2 A SPREADSHEET SOLUTION TO DESIGN A SINGLE SAMPLING PLAN FOR ATTRIBUTE INSPECTION 27-48

2.1 Spreadsheet solution to Graf et al’s method 27
2.2 Modified Graf et al’s Method (MGM) 30
2.3 Implementing MGM on spreadsheet 31
2.4 Computational experience and sensitivity 35
2.5 Comparison with Guenther’s method 40
2.6 Peach-Littauer’s algorithm 42
2.7 A Single Sampling Plan that minimizes ATI Observations 44

48
CHAPTER-3 ON SOME COMPUTATIONAL EXPERIENCES WITH SKIP-LOT SAMPLING PLANS 49-64
3.1 Determination of SkSP parameters 49
3.2 The effect of reference plan on the OC of SkSP 54
3.3 Behaviour of AOQL of SkSP with different inputs Observations 58 64

CHAPTER-4 CHARACTERIZATION OF INSPECTION ERRORS AND THEIR EFFECT ON SKIP-LOT SAMPLING PLAN 65-82
4.1 Inspection errors and their behaviour 65
4.2 The symmetric Beta distribution truncated at b (0 < b < 1) 67
4.3 Expected Apparent Fraction Defective and its behaviour 71
4.4 Empirical values of AQL, RQL & Error Mean-Adjusted 75
4.5 Effect of Beta distributed inspection error on Single
4.6 Effect of inspection error on Skip-lot Sampling Plan Observations 79 82

CHAPTER-5 EVALUATING SkSP-1 WITH A SPECIAL INSPECTION PROCEDURE BY VARIABLES 83-96
5.1 A new type of inspection 83
5.2 Some results on SkSP-1 84
5.3 The one-third split-lot inspection method 85
5.4 Estimation of μ and σ² 87
5.5 Performance measures of the procedure 90
5.6 One-third split-lot method with Attribute type inspection 94
5.7 OC of SkSP-1 with split-lot inspection by variables Observations 95 96
Appendix-1 97-100
Appendix-2 101-103
CONCLUSIONS AND SCOPE FOR FURTHER RESEARCH 104
BIBLIOGRAPHY 105-108
