ACKNOWLEDGMENTS

I consider it my profound duty and privilege to express my deep sense of gratitude to my revered teachers Dr. S.P. Bajpai, and to Dr. A.K. Kandya, Readers, Department of Botany, Dr. Hari Singh Gour Vishwavidyalaya, Sagar M.P., for their valuable guidance and supervision of the present research endeavor. Further, I am deeply indebted to them for going through the manuscript, correcting and editing this work.

I also express my sincere thanks to Professor K.M. Vyas, Head of the Department, for his continued interest and encouragement during the entire period of this work and for providing laboratory and library facilities without which the present work could not have been accomplished.

Thanks are also due to Professors G.P. Mishra, S.C. Agrawal and Drs. P.C. Jain, P.K. Khare, all my revered teachers, for their interest, suggestions and constructive criticism without which this work could not have been completed.

My gratefulness is also due to Dr. Parvez Jalil (S.F.R.I., Jabalpur), Dr. Mamta Purohit (T.F.R.I., Jabalpur), Drs. Smita Pandey, Sanjita Keshri, Sulekha Jain, Pradeep Tiwari and Dr. Ravi Prakash Agrawal, for their help in various ways. Thanks are also due to my colleagues and junior students of the department of their help and moral support throughout the present work.
I am thankful to Mr. R.R. Patel, Mr. B.P. Patel, Network Computer's Centre for Data processing, Data analysis, Graphical development and manuscript preparation.

Last, but in no way least, I acknowledge "behind the scene" contribution of my family members, especially my parents. Never did they allow anything to obstruct my research work in any way. Precisely, it is they who have made me what I am today. Beyond each and every doubt, every child is indebted to its parents, but I should never be able to assess or measure the indebtedness to my so benevolent and cooperative parents.

(ANUPAMA SINGHAI)
