LIST OF FIGURES

Figure 1.1: Routing within a Computer Aided Instruction System .................. 2
Figure 1.2: General Architecture of Intelligent Tutoring System .................. 9
Figure 1.3: SQL-Tutor: Knowledge-based Teaching System ...................... 20
Figure 2.1: Knowledge Management Continuum ...................................... 43
Figure 3.1: HKDA System Agent Architecture ......................................... 61
Figure 3.2: HKDA System Network Diagram .......................................... 65
Figure 4.1: HKDA Design Pattern System Architecture ............................. 70
Figure 4.2: HKDA System KAUS Model .................................................. 74
Figure 4.3: Process of Creating Instructional Plan in Pedagogical Experts ... 81
Figure 4.4: Sequence Diagram of Agents .............................................. 84
Figure 5.1: MVC Design Pattern ............................................................ 92
Figure 5.2: User Interface-Administrator Screen ..................................... 101
Figure 5.3: KAUS- Bivariate Sample Table (BST) .................................. 114
Figure 5.4: Question Bank Details .......................................................... 116
Figure 5.5: Auto or Manual Exam Configure ........................................... 121
Figure 5.6: KAUS Based Exam Configure Questions ............................... 124
Figure 6.1: HKDA-IQPES Intelligent Question Paper Evaluation System .... 136
Figure 7.1: Fault Diagnosis using an ANN .............................................. 146
Figure 8.1: Client Desktop Screen Image (Student Examination Screen) .... 156
Figure 8.2: Convert Client Desktop Screen Colored Image into Gray Scale 156
Figure 8.3: Image Registration Process .................................................. 157
Figure 9.1: Administrator Screen ........................................................... 165
Figure 9.2: Teacher/Tutor Screen ........................................................... 166
Figure 9.3: Student/Trainer Screen ........................................................... 167
Figure 9.4: Select Subject using Auto Examination Process ...................... 168
Figure 9.5: Auto Examination by Click on Proceed Button ....................... 169
Figure 9.6: Manual Question Paper Generation ....................................... 170
Figure 9.7: Manual Question Paper Student/Learner Result ...................... 171
Figure 9.8: Student/Lerner Agent Performance ....................................... 172
Figure 9.9: Graphical View of Student/Learner Agent Performance .......... 173
Figure 9.10: Illegal Screen Activities by Illegal Users ............................. 174
LIST OF TABLES

Table 2-1: Some Available ITSs .................................................................30
Table 2-2: Types of Knowledge .................................................................40
Table 3-1: Functionality of Commonly used Intelligent Agents ...............64
Table 4-1: Weightage Distribution .............................................................75
Table 5-1: Level of Question Types in the HKDA System .......................104
Table 5-2: Question Level and its Description .......................................107
Table 5-3: Objective Level and its Description .......................................108
Table 5-4: Bivariate Value of Question Level Range .............................109
Table 5-5: Sample Questions in Question Bank .....................................109
Table 5-6: Bivariate Sample of size 5 .....................................................110
Table 5-7: KAUS Model .............................................................................112
Table 5-8: KAUS Table Statistics ...............................................................113
Table 6-1: Question Types Supported in the HKDA System ..................132
Table 6-2: Different Types of Question .................................................139
Table 6-3: Result of BE Breaking ..............................................................142
Table 7-1: Result of the Test for Training the Network .........................148
Table 7-2: Analysing Student Data .........................................................149
Table 7-3: Five Test Data and Their Five Parameter Values .................151
Table 7-4: Distinguish the Result .............................................................152
Table 7-5: The Class Recommends the Result .......................................153
