ACKNOWLEDGEMENTS

It is a great pleasure to acknowledge the deepest sense of gratitude to Dr. Y.N. Sahai, M.Sc., Ph.D., F.A.Z., F.A.E.B., Reader in Zoology, under whose expert guidance the present research work was carried out. Dr. Sahai's zeal for scientific research, understanding attitude and patience provided the right kind of support a young research worker needs at the early stage of her career. Dr. Sahai not only took pains to scrutinise the thesis but helped the author with his valuable suggestions.

The author is very much thankful to Prof. R.S. Saini, M.Sc., Ph.D. (Sagar), Ph.D. (Cambridge), F.R.E.S., F.Z.S., F.R.M.S., Professor and Head Department of Zoology, Dr. Harisingh Gour Vishwavidyalaya, Sagar, M.P., for providing the necessary laboratory facilities for her research work.

The author is deeply indebted to Dr. S.K. Jain (Tufts University School of Medicine, Department of Biochemistry and Pharmacology, Boston, U.S.A.) and to Dr. (Mrs.) S. Sahai (Department of Zoology) for the meticulous care they took in her work. The work would not have taken the present shape but for the critical suggestions and fruitful discussions received from both of them.
The author is equally thankful to Mr. A.S. Mishra (Department of Botany), Dr. R.K. Bhatt (Govt. College, Narsinghpur) and Dr. Smita Banerjee (Department of Zoology) for the frequent discussions and keen interest in her progress of research.

The author wishes to express her thanks to Mr. B.N. Tiwari and Mr. R. Singh of Central Instrumentation Laboratory of the University for providing the facilities and in particular for readily making available their laboratory for computerizing the data; Dr. G.P. Mishra (Prof. and Head) and Dr. K.M. Vyas, Reader (Department of Botany) for their valuable suggestions from time to time, and for providing some chemicals for her research work and to Dr. Smt. S. Ayyar, Superintendent Girls' Hostel for taking continued interest in the scholar and for providing moral support.

The author wishes to express her profound thanks to her colleagues particularly Mr. Subodh Jain and Ku. Suneeta Singh, who rendered all help and assistance readily and inhesitantly. In this context she wishes to express her thanks to Ku. Nutan Thakur, who gave a good deal of her time in checking, arranging and numbering the typed scripts.

The author acknowledges with thanks to the help she received from Dr. Radha Pant (Allahabad University) through postal correspondence, and to the Librarians of Delhi
University Library, JNU Library (New Delhi), I.C.M.R. Library and National Science Library of All India Institute of Medical Sciences (New Delhi) for readily permitting her to consult libraries for her research work.

The Financial assistance from U.G.C. as Junior Research Fellow from 17.10.78 and Senior Research Fellow from 17.10.80 is gratefully acknowledged.

The author owes her respectful indebtedness to her parents, who have always been the source of moral support. The author takes this opportunity to record her thanks to her brothers Billoo, T2, Satish, Sanjeev and Arun. They were all great source of inspiration to her. But for their words of encouragement at times of despair, and other physical and moral support rendered by them throughout the research period, the work would not have come to a successful end.

The author would be failing in her duty if she does not acknowledge with thanks to the help rendered by Shri Rameshwar Patel, typist, who typed out the thesis in record time; to the store keeper D.N. Tiwari and the Laboratory Assistant Mr. Satish Chaturvedi for providing all the facilities at the laboratory during her research work.

The author finally expresses her sense of gratitude to all innumerable friends and well wishers who rendered many
valuable help, encouragements and support to bring out the present work.

Department of Zoology
Dr. Harisingh Gour
Vishwavidyalaya, Sagar, M.P.
