Acknowledgement

I take this opportunity with much pleasure to thank all the people who have helped me through the course of my journey towards producing this thesis. This thesis is far the most significant accomplishment in my life and it would be impossible without people who supported me and believed in me. It gives immense pleasure to express my thanks and appreciation to all who have been responsible for the completion of this work.

I would like to express my gratitude to Professor Anoop Misra, Director, Diabetes and metabolic research group, Fortis hospital and Diabetic foundation India New Delhi, who introduced me to the field of obesity and fatty liver. His wide knowledge and logical way of thinking have been of great value for me. His understanding, encouraging and personal guidance have provided a good basis for the present thesis. His extensive discussion around my work and interesting explorations in data has been very helpful for this study. He is a wonderful teacher and above all very good human being, working with him, gave me immense satisfaction and boosed my spirit towards achieving for there in my scientific careers. He had his own salient, compassionate way of motivation, when my experiment failed and I was down with discouragement. In his presence, I am not only learnt many way of the scientific profession but also many in depth human qualities, like patience, thankfulness and above all the value of feeling go in life.

I sincerely thank my thesis supervisor, Dr M, Quadar Pasha, Institute of Genomics and Integrative Biology, New Delhi, for his guidance, help and motivation. Apart from the subject of my research, I learnt a lot from him, which I am sure, will be useful in different stages of my life.

I am deeply grateful to Dr Kalpana Luthra, Associate professor, Department of Biochemistry, All India Institute of Medical Sciences, New Delhi, who gave her laboratory support for doing genetic study during my experimental work. Her ideals and concepts will have a remarkable influence on my entire career in the field of research.

I sincerely thank my project supervisor, Professor Randeep Guleria, Department of Medicine, All India Institute of Medical Sciences, New Delhi for his guidance, help and motivation. Apart from the subject of my research, I learnt a lot from him, which I am sure, will be useful in different stages of my life.

My sincere thanks to Professor Jain, Head Department of Biotechnology, Jamia Hamdarad University, New Delhi, who allowed and supported me for doing PhD Thesis.

I owe my most sincere gratitude to Dr N.K. Vikram, Associate Professor, Department of Medicine, All India Institute of Medical Sciences, New Delhi, for his valuable advice and friendly help.
My sincere thanks to Professor R.M. Pandey, Head Department of Biostatics, All India Institute of Medical Sciences, New Delhi, for their guidance in statistical analysis, detailed review, constructive criticism and excellent advice during the preparation of this thesis.

During this thesis work I have collaborated with many colleagues for whom I have great regards, and I wish to extend my warm thanks to all those who have helped me with my work in department of Medicine and Biochemistry, AIIMS, Fortis hospital and Institute of Genomics and Integrative Biology, New Delhi.

My sincere thanks to Miss Priyanka Nigam, diabetic foundation India, New Delhi, who gave me lots of support in my thesis work.

I am thankful to all the other Doctoral (Fellow) students (past and present) of AIIMS, New Delhi, with whom I share tons of fond memories. I would like to acknowledge the support and encouragement of my all friends. I would like to thank the Diabetes foundation India staff for their help. My sincere gratitude also goes to all those who instructed and taught me through the years.

Finally, this thesis would not have been possible without the confidence, endurance and support of my family. My family has always been a source of inspiration and encouragement. I wish to thank my late father Mr. K.N. Bhatt and my mother Smt. Pushpa Bhatt, whose love, teachings and support have brought me this far. I wish to thank my in-laws, for their affection, understanding and patience. I owe my loving thanks to my sister, brothers, they have lost a lot due to my absence from home, and without their encouragement and understanding it would have been impossible for me to finish this work.

Fellowship assistant from ICMR (Indian Council of Medical Research), New Delhi, India from time to time is gratefully acknowledged.

At least I am grateful to almighty god for keeping his blessing over me, Tanks You
