ACKNOWLEDGEMENT

I thank God, who makes all things possible, has enabled me to complete this work by his immense blessings showered now and ever.

I would like to record my gratitude to Dr. S. Kumaresan, Professor of Chemistry, M. S. University, Tirunelveli, for his supervision and guidance from the very early stage of this research and throughout the work. Above all and the most needed, he provided me unflinching encouragement and support during the course of this research work. His truly scientist intuition has made him as a constant oasis of ideas and passions in science, which inspired and enriched my growth as a student, and a researcher.

Words fail me to express my appreciation to my brother Dr. S. S. Velan. He deserves special mention for his love and affection shown to me always. The constant encouragement and financial support from my brother brought me to this level. I am indebted to him more than he knows. I thank my family for supporting me throughout my studies.

Many thanks go, in particular, to Mr. R. Ramasubramanian, my research colleague and friend. I would like to thank him especially for teaching me to use softwares like WinGX and Mercury. I am much indebted to him for his valuable discussions, and suggestions and furthermore, spending his precious times for helping me in various ways for the completion of this research work.

I convey my special acknowledgement to Dr. H. N. Vasan, Principal Research Scientist, Solid State and Structural Chemistry Unit, Indian Institute of Science, Bangalore for all the help rendered to me during my visits to IISc.
It is a pleasure to pay tributes to Prof. Dr. F. R. Fronczek, Louisiana State University, USA; Prof. Dr. Du Miao, Tianjin Normal University, China; Prof. M. Soriano-Garcia, Ciudad Universitaria, Mexico; Prof. Dr. Dario Brago, University of Bologna, Italy; and Prof. Sung Kwon Kang, Chungnam National University, Daejeon 305-764, South Korea who all helped me in collecting the single crystal X-ray diffraction data.

It is a pleasure to express my gratitude wholeheartedly to Mrs. Rajam’s family for their kind hospitality during my stay in Tirunelveli.

I am very much grateful to Prof. K. Veluraja for allowing me to use the internet facility in his lab. My sincere thanks are due to my seniors Dr. M. Jothibai Margret, Reader in Chemistry, Pope’s College, Sawerpuram, Mrs. P.G. Seethalakshmi, Head, Department of Chemistry, A. P. C. Mahalakshmi College, Tuticorin, Dr. P. Ramadevi, Lecturer in Chemistry, Rajalakshmi Engineering College, Chennai, Mr. P. Sri Renganathan, Principal, Mano College, Sankarankovil, and Ms. K. Saroja, Lecturer in Botany, Sri Parasakthi College for Women, Coutrallam and other research scholars of our group.

Collective and individual acknowledgments are also addressed to my counterparts in other departments: Mr. J. Fermin Angelo Selvin and Ms. T. R. K. Priyadarshini, Research Scholars in Physics, and Ms. P. Melbha, Research Scholar in Tamil of M. S. University whose friendship has been perpetually helpful and memorable.

I sincerely thank the Council of Scientific and Industrial Research (CSIR) New Delhi, India, for providing me Senior Research Fellowship (SRF). Finally, I would like to thank everybody who encouraged me to the successful realization of this thesis.

M. Indrani
