List of Figures

Figure 4-1: Gross and net irrigated area in sub-regions of Karnataka ......................... 74
Figure 4-2: Changes in net irrigated area in Karnataka ............................................... 77
Figure 5-1: Volume of water used per acre of irrigated area across scarcity and non-
scarcity villages ........................................................................................................... 112
Figure 7-1: Gap between private and social marginal cost ............................................. 179
Figure 7-2: Depth of wells in Low Well Interference Area (LWIA) ................................. 183
Figure 7-3: Depth of wells in High Well Interference Area (HWIA) ............................... 183
Figure 7-4: Distribution of wells by depth in LWIA ..................................................... 184
Figure 7-5: Distribution of wells by depth in HWIA .................................................... 185
Figure 7-6: Change in area irrigated per well in LWIA ................................................. 189
Figure 7-7: Change in area irrigated per well in HWIA ............................................. 190
Figure 7-8: Declining trend in the gross irrigated area in LWIA and HWIA ................. 191
Figure 7-9: Declining water levels in the study areas .................................................. 206

List of Charts

Chart 1-1: Groundwater Development and Its Impacts ................................................. 8
Chart 3-1: Framework for Analyzing Groundwater Exploitation, Livelihood and
Externalities .................................................................................................................... 55
Chart 6-1: Analytical Framework - Access to Groundwater and Its Impact on Livelihood
System ......................................................................................................................... 132
Chart 7-1: Analytical Framework - Groundwater Exploitation, Externalities and Welfare
Loss ............................................................................................................................... 176
