  1.27.1 Dependent variables
  1.27.2 Independent variables
1.28 Tools used for data collection
1.29 Statistical techniques used for data analysis
1.30 Delimitations of the study
1.31 Overview of the chapters

CHAPTER – II    REVIEW OF RELATED LITERATURE
2.1 Introduction
2.2 A conceptual model for reviewing ICT use in Continuing Medical Education
2.3 Descriptions of the use of specific ICTs and integrated technology systems in Continuing Medical Education
2.4 Opportunities and challenges related to the effective use of ICTs, especially in developing areas

CHAPTER – III    METHODOLOGY
3.1 Introduction
3.2 Locale of the study
3.3 Sample of the study
3.4 Tools used for data collection

3.5 Components and statements in perception scale

3.6 Components and statements in 4-E model questionnaire

3.7 Validation of tools

3.7.1 Validity

3.7.2 Reliability

3.8 Scoring of perception scale scores

3.9 Scoring of 4-E model questionnaire

3.10 Statistical techniques used for analysis

5.2 Need, context and significance of the study

5.3 Statement of the problem

5.4 Research questions

5.5 Objectives
5.6 Hypotheses

5.7 Methodology of the study

5.7.1 Locale of the study

5.7.2 Sample of the study

5.8 Variables of the study

5.8.1 Dependent variables

5.8.2 Independent variables

5.9 Tools used for data collection

5.10 Statistical techniques used for data analysis

5.11 Operational definitions of the key terms

5.12 Delimitations of the study

5.13 Findings

5.14 Discussion of major findings and conclusions of the study

5.14.1 Discussion of major findings

5.14.2 Key conclusions

5.15 Recommendations

5.16 Implications of the study

5.17 Suggestions for further research
