Acknowledgements

As I look back into the last five years of my life, I feel what an amazing journey it has been. At the near end of this pendulum journey I am filled with satisfaction of some accomplishments and have learnt the most valuable lessons of life which have made me wiser. I thank God for bringing me this proud moment in life.

The first person who should be thanked is my mentor Prof. V.S. Chauhan. I am truly blessed to have such an angelic mentor. He has given me immense creative freedom, supported my work, trusted in my capabilities and patiently listened to me on several occasions and taught me the essence of doing science. It is truly commendable on his part that despite his super busy administrative work as a director of institute he was available for his students. As my supervisor, he has constantly guided me to remain focused on achieving my goal. I thank him for providing great working atmosphere and infrastructure at ICGEB which has enabled the successful completion of my Ph.D.

My sincere thanks to Dr. S.K. Jain, my co-supervisor, who has been inspirational, supportive, approachable and encouraging. His valuable suggestions during my seminars have been particularly noteworthy. I sincerely thank him for helping me in dealing with administrative work at Jamia Hamdard.

I would like to express my sincere thanks to Dr. Deepak Gaur for his valuable discussions, critical feedback to my work and teaching me the importance of planning of experiments. His diligence has inspired me to follow time lines and be focused in work. His valuable input to my PLOS ONE paper is deeply appreciated.

Words can’t completely express my gratitude to Dr. Shailja Singh who has been instrumental in shaping my Ph.D work and under her guidance I have learnt regarding planning and performing experiments. I can never forget how she turned up for me over
weekends and at late nights to help me draft manuscripts. She is truly special and my lucky mascot as any association with her has proved fruitful for me.

I would like to take this opportunity to thank Dr. Chetan Chitnis for providing me the antibodies to carry out my localization experiments. I sincerely thank Dr. Asif Mohammed for teaching me the basics of molecular cloning. My first cloning at ICGEB was under his supervision and I will always remember the little tricks that he taught me to design primers. I thank Dr. Amit Sharma for providing me the pETM11 vector. I thank Dr. Pawn Malhotra, Dr. Renu Tuteja, Dr. Dinesh Gupta and Dr. Paushali Mukherjee for their help.

I am grateful to Dr. V.S. Reddy for helping me with my mass spectrometry experiments. I want to thank Dr. SAM and Dr. Dinkar Sahal for their super exciting scientific discussions.

I thank Dr. T.K. Das and Dr. Nag from Department of Anatomy, AIIMS for teaching me the basics of immuno labeling. A special thanks to Anurag Singh, Chanda Mam, Meherbaan singh Ji and Sandeep Sir at AIIMS for cutting my sections bypassing the queue.

My stay at ICGEB has been made memorable because of bunch of such good friends that have helped me in every possible way.

I foremost thank Sachin Sir for helping me to take the decision to join ICGEB rather than IIT. His valuable advice has proved to be a game changer for me.

I am lucky to have Akash or sainiakash@gmail.com as my friend. A wonderful colleague who switched off my gels late in night, changed the dialysis buffer for my protein, taught me how to handle electron microscope, often corrected my English grammar and gave me my Lab name TAYI. I want to thank him for all the useful
suggestions that he gave me during the tough phase of Ph.D. The time spent with him and Shaheena during Chai sessions in canteen and Naivedyam trips are truly memorable.

Shaheena, what a wonderful person I was fortunate to be with. She taught me several techniques, helped me analyze my data, patiently listened to me on several occasions and gave me very valuable suggestions professionally and personally. She taught a trick for performing IFA by scratching the smear to know if the orientation of slide is right or not. This part is mentioned as per my promise to her. All the fun sessions at Canteen ki CHAI and shopping sessions at Peeche wale Mall will be cherished.

I thank Sumit Rathore for his friendship and support during the entire tenure of my Ph.D. Thank you for listening to me most of times and motivating me to get my experiments right. There has never been a moment when I looked to him for help and he turned me down. A friend like you will be cherished through life.

Asad, my most dear friend deserves special mention for his amiable nature. He is a real hero for me as he taught me to be happy even in adverse situations. I shared with him all my lab experiences from my first positive PCR to acceptance of manuscript and he reciprocated all the happiness. I am blessed to have a dear friend like him.

I thank Manvi for introducing me these people (Sumit and Asad) and being such a genuine friend with whom I have shared all my professional and personal experiences.

I thank Shadab for his help and support during my Ph.D. His witty one-liners always made me laugh and helped me forget the stress of unsuccessful experiment. His S&S security service with Sumit always ensured that I reach to Metro Station safely when my experiments fail to fall in official time lines. I thank him for being such an adorable friend.
My dear friend Faiza deserves a special place in my list of friends. Our bonding has grown stronger during our U.K visit and ABLE-BEST competition application. I thank her for all the professional and personal support and the fantastic moments spent together. I wish our friendship grows stronger in coming years. I thank Swati for all her help and for sharing Shailja mam’s discussion timing with me. Sarvanan deserves a special mention for all his online and offline help. Whatever little I know of mass spectrometry, I owe it to him.

I thank my current lab mates, Akanksha for all the fun moments we had together, for all the help in lab and for sharing the gossip. I thank Udbhav, the toddler of my lab for all the fun, gossip and scientific help. My new chai and lunch partner Anjali is acknowledged for all the masti moments in lab. A special thanks to Puneet for all the help with protocols and reagents that he provided me during my Ph.D. He is kind of 'Yes Man' who will arrange any reagent for your experiment. Alok Ji is acknowledged for teaching me culture work and helping me with my experiments. Sony is acknowledged for all the help in conducting my experiments especially ECLs. My sincere thanks to Tajali, Heena, Enna Mam, Pallabi, Emanuel, Poonam, Hamda, Chaitanya, Gaurav, Sonal, Kunal, Hema, Surbhi, Amrita, Shalini, Kajal, Pallavi for their help and making lab a friendly place. Trust me guys without your presence lab is truly unexciting.

My sincere thanks to Abhishek Sir from Sam’s lab for helping me immensely with my cloning conundrums. Bhabha is specially acknowledged for switching off my SDS-PAGE gels and changing the dialysis buffer for my protein on several occasions.

My Jamia batch mates from ICGEB i.e. Neha, Shipra, Shalini, Moaz, Javed, Rajendra, Khalid, Puneet and Bhabha are specially acknowledge for their help during the administrative procedures of Jamia and for all the fun moments we had together.
I thank my past lab mates, Krishna, Dipto, Enayet (parasite doctor), Neha Dubey, Jyoti and Madhavi for their help. Also I would like to thank Aseem for his gyaan, Sarika for her scientific and personal help and Rashmi Di for mass spectrometric experiments. I want to thank my friends from other groups of ICGEB i.e. Ankur, Sobia, Shivani, Harshesh, Naveen, Dinesh, Monica, Saurabh, Rahul raina, Gaurav Datta, Prasida and Tenzin Mam for their help which was beyond lab boundaries.

My sincere thanks are also due to Sangram Singh ji and Ajay Ji for their constant help in routine lab work. I thank Ashok Ji and Rakesh ji for their help in animal experiments. Rawat ji is specially acknowledged for his calm nature and for processing my indents in time. I thank Sovan and Pratibha for their help.

I thank Sachin and Tina for all the help they provided at sir’s office. Tina is specially acknowledged for her giggling nature and her in-time help. Sachin, a true Punjabi always made my trip to sir’s office a memorable one with his one-liners. I thank Jasmine from Jamia Hamdard for all her help. Anish Cherian, Irfan Ji and Farid Ji and all other people in the academic section and biotechnology department deserve special mention for their help. I thank all my teachers for teaching me the valuable lessons in life (academic and otherwise) which has helped me to cruise through Ph.D.

A heartfelt sincere thanks to my car pool mates i.e Venkat ji, Vidhyarthi Ji, Chaterjee, Inder Ji, Mohan Ji and Vinita for their enormous support. It’s because of these people that I was able to finish my Ph.D staying at home. They patiently waited for me when I used to be late during evening time. They discussed my research with great enthusiasm and they are like my extended family.

God’s been really kind for bestowing me with the most wonderful, caring, affectionate and understanding parents. I am nothing without their support. They believed in me, motivated me, stood by me in the toughest phases of Ph.D. My dad has
always taught me the importance of sincerity and hard work to achieve my goals. My Mom has been my biggest pillar of support and the major motivation behind the successful completion of my Ph.D. It’s been their dream to see me as a doctor and today with their love, support and blessings it has become a reality. My lovable Bhai and lovely Bhabhi are a true blessing in my life. They both don’t know much about science yet they supported me in every possible way. Thank you both for all your love, care and affection. My niece Akshita a.k.a Bubble is my sweet heart. She is someone whose presence made me forget all the stupid experiments which failed in lab. I used to forget every piece of stress in her magical presence. The only thing she hated about my work that I have to work over weekends (may times) and she told me several times “Bua apka lab kitna ganda hai, apko to Sunday ko bhi kaam karna padta hai”. The phrase she flaunted among her friends “Meri Bua Doctor hai” is finally a reality.

My sincere gratitude to my Nanu and Nani for their immense love and care, specially my Nanu who’s been calling me a doctor ever since I joined Ph.D. My cousins and relatives are thrilled at me becoming the first doctor of the family.

CSIR is duly acknowledged for financial help (though untimely through the entire tenure).

The final and indeed the most important thanks to God, for making this dream a reality.
