First and foremost, I would like to acknowledge with gratitude, the great providence of Almighty God for providing me this opportunity to put a brick into the building of uncovering the mechanisms of “Heavy metal induced neurotoxicity”. His divine guidance and blessings in all my endeavors and bringing me this far in my academic career. For the successful accomplishment of any task, constant inspiration, encouragement, affection, blessing and able guidance play an important role. To acknowledge such people and institutions is not a formality, but is the feeling of gratitude. I will fail my duties if I do not record my debts to the following persons who have provided me with all that was necessary to produce this manuscript.

At this moment of accomplishment, first of all I pay homage to my mentor Dr. Chetna Singh, Senior Scientist, Developmental Toxicology Division, Indian Institute of Toxicology Research (IITR), Lucknow for her inspiring sagacious guidance, patience, crucial contribution and constant encouragement which made a backbone throughout the study. Her wide knowledge and her logical way of thinking have been of great value for me. I could not have imagined having a better advisor and mentor for my PhD, and without her sensibility, knowledge, perceptiveness and cracking-of-the-whip I would never have achieved what I have today. She was always there to solve my queries by providing her fine thoughts about the subject by sacrificing her golden time that helped me to bring this dissertation to its conclusion. I feel greatly indebted and proud to have done my dissertation work under her. I have always been inspired by her passion towards perfection and shall imbibe it as I sail through my life.

It exceed my bliss height in expressing my deep sense of gratitude to Prof. S. K. Jain, Head, Department of Biotechnology, Jamia Hamdard, Hamdard University, New Delhi, my Co-Supervisor, who has not only been my supervisor, but also perennial source of inspiration in all my endeavors. He is a person with extraordinary skills and academic depth, a teacher who has devoted his life in enlightening the minds of so many. He is a teacher who affects mental horizons, one can never tell where his influence stops. I am grateful to him for excellent guidance, constructive criticism and mentoring all through my professional courses.

My vocabulary is not wide enough to express my high sense of gratitude for Dr. M. P. Singh, Senior Scientist, Indian Institute of Toxicology Research (IITR), Lucknow, for sparing his valuable time, suggestions and providing facilities to work in his laboratory.

I acknowledge to Dr. Ashwini Kumar, Former Acting Director and Dr. K. C. Gupta, Director, IITR, for providing me the necessary laboratory facilities and their keen interest in the work.

I sincerely thank the Vice-Chancellor Dr. G N Qazi, Jamia Hamdard (Hamdard University), New Delhi for giving me the opportunity for PhD enrolment.
I take this opportunity to convey my special thanks to Dr. D. Parmar, Dr. D. K. Patel, Dr. Pramod Kumar, Dr. A. B. Pant and specially Dr. R. S. Ray for their generous help and valuable suggestions on various realms during this study.

It gives me immense pleasure to thank my seniors Dr. Virendra Singh, Dr. Ghanshyam Upadhyay, Dr. Seema Singh, Dr. Israr Ahmad, Mrs. Smriti Shukla and Dr. Anand Kumar Singh for their co-operation and help.

I am in particular thankful to my senior, Dr. Ashutosh Kumar for his friendliness and valuable support whenever I needed.

It is with pleasure that I wish to acknowledge my colleagues Satya Prakash Gupta, Sharwan Yadav, Manindra Nath Tiwari, Naveen Kumar Singhal, Garima Srivastava, Anubhuti Dixit, Amit Kumar Chauhan, Sonal Agarwal, Deepali Singh, Ashish Singh, Divya Verma, Pratibha Tripathi, Shalini Agarwal and specially Vinod Kumar for their co-operation and cheerful company.

Few names are there, who play instrumental in the completion of this task and otherwise also to make my perineal stay in Lucknow as sweet memories of my life. These important names are; Mr. Abhishek Kumar Singh, Mr. Shambhoo Sharan Tripathi, Dr. Mahendra Kasyap, Dr. Kartikey shukla, Dr. Ritesh Kumar Shukla, Mr. Jitendra Kumar Tripathi, Mr. Ankit Macwan, Mr. Mradul Mohan, Mr. Ram Niv ... and Mr. Ashish dwivedi.

I am blessed with few wonderful friends who were there during all my needs and wants. Help, cooperation and love rendered by Anand Singh, Ravikant Pandey, Gunjan Misra, Ravi, Rishabh, Shashi and Pooja Tiwari deserve all my appreciations.

Above all I feel particular pleasure to express my heartfelt gratitude to all my teachers for everything they have inculcated in me.

I am grateful to University Grants Commission, New Delhi, for providing me research fellowship throughout my Ph.D. programme.

Although I have acknowledged many persons for their moral boosting, encouragement, co-operation and timely help but undoubtedly my parents are the chief contributors. The whole of my life and education bears the stamp of sacrifice, love, care, affection and blessings by my parents. The contribution of my family members, my brothers, my sisters, my sweet nephew and niece in completion of this work has no bounds. It is their endeavour which motivated me throughout.

At last but not the least, I owe much to all my experimental animals for their silent sacrifice without which the present study would have been impossible.

Brajesh Kumar Singh
