List of Tables and Figures

Review of Literature
Table 1: Estimates of TB burden in India
Figure 1: Estimated TB cases per 1000 population in different cities of India
Figure 2a: Rod shaped *M. tuberculosis*
Figure 2b: Cell wall structure of *M. tuberculosis*
Figure 3: Types of TB and their symptoms
Figure 4: Risk factors for TB
Figure 5: Chemical structure of anti-TB drugs
Figure 6: Mode of action of anti-TB drugs against *M. tuberculosis*
Figure 7: Location of Liver
Figure 8: Schematic representation of Isoniazid metabolism in Liver
Figure 9: Exogenous and endogenous source of reactive oxygen species
Figure 10: Schematic diagram of the process of lipid peroxidation

Materials and Methods
Table 1: Categories of TB cases and treatment strategy under DOTS
Table 2: Primer sequences for *GSTM1* and *GSTT1* genes
Table 3: Primer sequences for *CD36* and *CYP1A1* genes
Table 4: Components of PCR reaction mixture for *GSTM1* and *GSTT1* gene
Table 5: Conditions of PCR reaction for *GSTM1* and *GSTT1* gene
Table 6: Primer sequences for *CYP2E1* gene
Table 7: Components of PCR reaction mixture for *CYP2E1* gene
Table 8: Conditions of PCR reaction for *CYP2E1* gene
Figure 1: *M. tuberculosis* bacteria using acid fast Ziehl-Neelsen stain
Figure 2a: Sputum sample
Figure 2b: Growth of *M. tuberculosis* on LJ medium
Figure 2C: Colonies of *M. tuberculosis*
Figure 3: Primer designing and selection of restriction enzyme
Figure 4: Representation of PCR-RFLP technique
Results

Table 1: Baseline demographic and disease characteristics of total patients
Table 2: Level of liver function parameters in patients with and without DIH
Table 3: Risk factors for anti-TB-DIH by multivariate logistic regression analysis
Table 4: Baseline characteristics of cases and controls
Table 5: Level of liver function parameters in cases and controls
Table 6: GSTM1 and GSTT1 genotype frequencies in patients with DIH (Cases) and without DIH (Controls)
Table 7: Combined GSTM1 and GSTT1 genotype frequencies in patients with DIH (Cases) and without DIH (Controls)
Table 8: Characteristics of patients with anti-TB-DIH, stratified by GSTM1 genotype
Table 9: Level of liver function parameters in patients with anti-TB-DIH, stratified by GSTM1 genotypes
Table 10: Characteristics of patients with anti-TB-DIH, stratified by GSTT1 genotype
Table 11: Level of liver function parameters in patients with anti-TB-DIH, stratified by GSTT1 genotype
Table 12: Frequency of CYP2E1 genotype in patients with DIH (Cases) and without DIH (Controls)
Table 13: Characteristics of patients with anti-TB-DIH, stratified by CYP2E1 genotypes
Table 14: Level of liver function parameters in patients with anti-TB-DIH, stratified by CYP2E1 genotypes
Figure 1: Prevalence of anti-TB-DIH in total patients with TB
Figure 2: Clinically observed symptoms of anti-TB-DIH
Figure 3: Alteration in liver function test in patients who developed anti-TB-DIH;
Figure 4: Age wise distribution of TB patients with and without anti-TB-DIH
Figure 5: Sex wise distribution of TB patients with and without anti-TB-DIH
Figure 6: Marital status of TB patients with and without anti-TB-DIH
Figure 7: Socio-economic status of TB patients with and without anti-TB-DIH
Figure 8: Body mass index (BMI) of TB patients with and without anti-TB-DIH
Figure 9: Disease classification of TB patients with and without anti-TB-DIH
Figure 10: Extra-pulmonary sub-classification of TB patients with and without anti-TB-DIH
Figure 11: Distribution of HIV (positive/negative) cases in TB patients with and without anti-TB-DIH
Figure 12: Type of cases in TB patients with and without anti-TB-DIH
Figure 13: Level of MDA in TB patients with and without anti-TB-DIH
Figure 14: Level of GSH in TB patients with and without anti-TB-DIH
Figure 15: Level of SOD in TB patients with and without anti-TB-DIH
Figure 16: Genomic DNA isolated from human blood sample
Figure 17: Marker (Puc 19 Mspi)
Figure 18: PCR products of GSTM1 gene
Figure 19: PCR products of GSTT1 gene
Figure 19: PCR products of CYP2E1 gene
Figure 21: Polyacrylamide gel electrophoresis of Rsal digested genotypes of CYP2E1
