Acknowledgement

This work of research is born out of experience, of spending sleepless nights, of toiling, of burning out the midnight oil and of countless sacrifices made by my husband and son. Also scores of people have contributed directly or indirectly and they are too many to thank individually. Those, without whose backing, this work would never have been completed, I have expressed my deep felt gratitude by quoting their names but others will recognize their contributions in subtler ways.

Of course my prayers to the Almighty for providing me an aura of opportunity for getting this work underway and for letting me be in the midst of good and kind people.

Gathering of the research work and writing of thesis is a real laborious work and is not possible without the help, advices and suggestions from many. I humbly acknowledge them. The words of acknowledgement are miniscule but the feelings behind are insurmountable and born out of deep love, sincerity and affection.

I deem it a matter of great privilege and honour to express my deepest sense of gratitude to my esteemed supervisor Prof. D.V. Kohli for his constant help, affection and valuable guidance during the entire research course. I express my sincere indebtedness to him. Many are the moments when I have looked up onto Prof. Kohli for rectifying the mistakes I have made during my research, many are the days when I have been stuck up for the results I desired. For each and every of these moments, it was Prof. Kohli's patience, inspiration and moral guidance which led me into the path of victory and took me more and more towards my goal.

No words are sufficient to express my profound gratitude and venerable regards to Dr. S.K. Jain, for his able supervision, crucial back-up, insightful criticism and energetic assistance. He was always present for me whether the need arose or not. I also cherish the amount of freedom I have enjoyed during the project under him. I am proud of his devotion for the work, suggestions, timely criticism, perfect evaluation and encouragement in each step of this project work. My gratitude would be but incomplete without remembering Mrs. Jain for rendering to me the nice homely environment. I will never forget the love, care and affection I have received from her and the enjoyable time spent together with Sakshi and Srajan. How does a person say “thank you” when there are so many things and moments to thank for? Obviously by conjecturing upon Dr. Jain as my powerful role model and to his wife for inspiring me with love and kindness, I can only justify an element of gratitude and trust I have for them.
I am highly obliged to Prof. S.P. Vyas, Head Department of Pharmaceutical Sciences, Dr. Hari Singh Gour Vishwavidyalaya, Sagar, for providing all the necessary facilities to carry out this work. I have always received valuable suggestions and co-operation from him.

I would like to express profound and sincere thanks to Prof. V.K. Dixit and Prof. N.K. Jain, former, Head Department of Pharmaceutical Sciences, Dr. Hari Singh Gour Vishwavidyalaya, Sagar, for providing all the necessary facilities to carry out this work of this project work.

I am deeply indebted to the teaching staff of our department for making my career fruitful by transferring their nascent knowledge and experiences in the Pharmacy field. I am happy to remember many are with an “ocean of knowledge” and helping hands. Sincere thanks are due to Prof. M.D. Kharya, Prof. P. Mishra, Prof. G.P. Agrawal, Dr. R.K. Agrawal, Dr. Abhay Singhai, Dr. A.C. Rana, Lopa Madam, and Dr. Parijat Kanaujia for their necessary help whenever I was in need.

Friends Aviral, Nitin, Manish and Mohini without whose playful pranks and emotional support this research work would have become dull and dreary. They have infused my work with youthful energy and a freshness which I will cherish all my life.

I also place on record encouragement received from my loving family friends Anees Mamu and Sheeba. The magnanimous help and suggestion given by them is really difficult to put in words.

I will be failing in my duties if I don’t mention the undeniable support and co-operation rendered to me by my juniors and friends and research scholars namely, Piush, Yashwant, Anikant, Subheet, Shikha, Abhay, Jagan, Papiya, Alok, Rajesh, Ram Kumar, Mohan, Praveen, Dinesh, Sunil, Prem, Anil Shrivastava Sir, Gyati, Sulekha, Mayank, Rahal, Tarang, Priyanka and Sadia.

I sincerely acknowledge the moral support of the members of the Controlled Release Society for providing the opportunity to present my research work during the CRS conference in Hawaii, USA.

I owe my special thanks to Dr. D.K. Saraf Sir, Reader Department of Zoology for his diligent efforts in providing me the facilities to perform the microtomy of animal tissues.

I owe my special thanks to Dr. D.C. Prasad, Head Department of Nuclear Medicine, Jawaharlal Nehru Cancer Hospital and Research Center, Bhopal, Ms. Neeti, Ms. Asha and Mr. A. Roy. They helped me to a great extent during my in vivo studies.

I am thankful to AIIMS, New Delhi for conducting TEM studies. I would like to remember all the non-teaching staff for their time-to-time help and co-operation.

The love, care and affection, I have got from Sanjay Bhaiya, Sapna and Sarthak is unforgettable. They stay behind as a source of invariable encouragement.
It is beyond the capacity of all words to express my respect and profound affection for my parents and mother in law. Today whatever I am it is only by virtue of their unlimited care, affection and blessings. The love and affection extended by my Didi(s)Usha, Nisha, Abha, Shubha and jjajji(s) and Neetu, Pinki, Bobby and Husbands. They remained as a source of constant inspiration. And above all Gunjan, my youngest sister, who had taken a lot of pain during my research work, is memorable. Her child like innocence and freshness has prompted me to infuse this research work with a certain amount of vitality which will make it more interesting.

My deep felt gratitude to Mr. P. Bhashyam, Chief General Manager, S.B.I. Lucknow Circle, Mr. S.C. Goyal, Regional Manager, S.B.I. R.B.O. Sagar, and Mr. Narsimham, SBI, Bhopal for their help, guidance and timely advices.

I am highly thankful to Meenu, Adinath Computers for providing me a nice company and excellent compilation of work.

Finally, my sincere thanks to the scores of friends, colleagues and other persons who have generously lent their valuable contributions to this research. Every effort has been made to give credit where it is due for the material contained in this research. Even if inadvertently some name must have been left out, I can only say with equanimity their contributions will not go into waste, as this work of research is meant to benefit humankind in some form or the other.

Vandana Soni
