ACKNOWLEDGEMENTS

Tradition and innovation are two decisive aspect of science. Tradition being the basis, embodies cumulation of wisdom in the body of knowledge and therefore paving way for innovation. Innovation is an adventure, a challenge, with which origins the role of calling into question ones own scientific identity gained through tradition. Persisting in tradition without innovation soon leads to a tiresome routine and dies. On the other hand pure innovation harbors the danger of superficiality. Nevertheless, challenge and willingness can only justify science.

At this crossroad, after tortuous three and half golden years of life, I sit back in introspection and retrospection, my mind flashes on the source of enthusiasm and inspiration been bestowed upon by numerous people. I wish to record my gratitude to all of them.

My "Guruji" Prof. S. P. Vyas, is the main personality behind the successful completion of this work. It is his vigilant research insight, stalwart cognizance, perseverance, and prodigious criticism, which resulted in a vanquishing the project. He is the person who introduced me to almost all versions of this wonderful field. His unsatiable hunger for more and more quality work has ever kept me on toes. It is perhaps impossible for me to find appropriate words to acknowledge his all time efforts. At this juncture I wish quote 'a verse' taken from 'Vedas' which perfectly suits his qualities:

"A guru
is sinless, unsmitten by desire and a knower of Brahman par excellence.
who has withdrawn himself into Brahman;
who is calm like fire that has consumed his fuel.
who is a boundless reservoir of mercy and a friend of all good people".

I am grateful to Prof. V.K. Dixit, Head, Dept. of Pharmaceutical Sciences, Dr. H.S. Gour Vishwavidyalaya, Sagar for providing the necessary facilities to carry out this work. His personality as valuable academician, excellent researcher and a proficient administrator has always motivated me to face the hardships of life calmly. For the continued flow of moral support and suggestions at divergent stages that I received from Prof. J.G Asthana, I owe my deep indebtedness.

I offer my sincere gratitude to our Shri. Shiv Kumar Shrivastava, Honorable Vice Chancellor, who has always been encouraged for quality research activities in the university.

I am obliged to Dr. K. P. Mishra Sc(G) Bhabha Atomic Research Center, Mumbai for helping in carrying out radiolabeling studies. The friendly atmosphere and the cooperation rendered by Mr. B.N. Pandey, Miss Dipti and Mr. Sachin during my stay in Mumbai is gratefully acknowledged.

I am thankful to Dr. Hasan Sc(D) BARC for helping in collecting DLS data. I am also thankful to Mr. M.R. Sharma, RSIC, Panjab University Chandigarh for excellent electron micrography of my samples.

The financial assistance provided by CSIR in terms of Senior Research Fellowship (Jan 1996 to May 1998) is duly acknowledged.

I record my gratitude towards all teaching and non-teaching members of Department of Pharmaceutical Sciences, Dr. H.S. Gour Vishwavidyalaya Sagar, for their help not only during the completion of project but also during my stay in Sagar.
Parijat and Vankatesan need no formal word of thanks nor would I myself belittle the bond. They have stood beside me through every thick and thin. I am proud to have friends like them. Vivek, Vaibhav, Seenu, Preeti, Meenakshi, Paramjit and Srinath for their affection and unconditional help even at odd hours are also gratefully acknowledged. I am thankful to all other research scholars for their company.

I cannot forget the role of Dr. T. Saktiveil, CDDR, London, for his worthy suggestions.

I wish to take this opportunity to offer my gratefulness to Dr. D.K. Saraf, Dept. of Zoology and Dr. Kalpana Saini, Dept. of Anthropology for their cooperation and affection during my stay in Sagar.

I appreciate the role of Mr. Navin Kongo, Dept. of Applied Microbiology, Dr. Harvinder Bhavra and Dr. Vinay Mishra, FSL, Sagar, for their friendly advice, solidarity and encouragement.

The Librarian, National Medical Library, New Delhi; National Institute of Immunology, New Delhi; Central Drug Research Institute, Lucknow; National Institute of Pharmaceutical Education and Research, Mohali; Jawaharlal Nehru Pustakalaya, Sagar, are duly acknowledged for providing valuable literature to carry out the work.

I was lucky to cherish the moments spent with my all time friends Vineet, Shallu, Dabu, Kannan and Yogesh. I am thankful for their affection and enthusiasm. I offer my sincere gratitude to my classmates Jagdeep, Vishal, Rajiv, Harinder, Aashu and Sanmati for their continual enthusiasm.

I extend my deep thanks to Som, Anchal and Sonal for the affection and care.

I offer my gratitude to all my students especially Amit and Vijay for their courageous support during the completion of this project. I also wish to record the efforts of my juniors Silakari, Mohan, Anshuan, B. Sarvana Babu, Shankar and Vishal.

I am indebted to my parents who patiently tolerated the agonies that beset distance and encouraged me achieving my goals. I also owe a fair share of heartfelt gratitude to my sister who constantly encouraged me with love and affection and some times prompted me with jibes and taunts to reach the goal.

Last but not least I am thankful to Pinka Chakde for flawless typing and Paro Mashab for designing of figures my text. Rahul and Sudhir of SR Computers for their help whenever my system collapsed are also acknowledged.

I pay my tribute to Sir Dr. Harisingh Gour, founder of our university.

Finally, I pray to God Almighty for bestowing everything I got in life.
