Fig. III-1: Attachment index and phagocytic index of macrophages at different days after inoculation of DV i.c.  
(a) Peritoneal macrophages  
(b) Splenic macrophages  
(c) Uninfected control

Fig. IV-1: Total number of cells of mice at different periods after intravenous inoculation of the cytotoxic factor.  
(a) Peritoneal cells  
(b) Splenic cells  
(c) Control, uninoculated mice

Fig. IV-2: Pattern of attachment and phagocytosis of the opsonized sheep erythrocytes (SRBC) by peritoneal macrophages at different times after intravenous inoculation of CF or in control, uninoculated mice.

Fig. IV-3: Attachment index and phagocytic index of the peritoneal macrophages at different times after intravenous inoculation of CF. C - uninoculated control mice.

Fig. IV-4: Pattern of attachment and phagocytosis of the opsonized sheep erythrocytes (SRBC) by splenic macrophages at different times after intravenous inoculation of CF or in control, uninoculated mice.

Fig. IV-5: Attachment index and phagocytic index of the splenic macrophages of mice at different times after intravenous inoculation of CF. C - uninoculated control mice.
Fig. IV-6 : Effect of various dilutions of CF on the attachment index and phagocytic index of macrophages 2 h after intravenous inoculation of CF. .. 168
(a) Splenic macrophages
(b) Peritoneal macrophages
(c) Uninoculated control mice

Fig. V-1 : (a) Total number of cells and
(b) Percentage of macrophages .. 176
In the peritoneal cavity of spleenectomized and sham-operated mice at different days after inoculation of DV i.c. C-uninfected control.

Fig. V-2 : Attachment index and phagocytic index of peritoneal macrophages of mice at different days after inoculation of DV i.c. C-uninfected control. .. 184

Fig. VI-1 : (a) Attachment index and
(b) Phagocytic index .. 195
of peritoneal macrophages at different days after inoculation of DV i.c. of mice treated with various doses of mitomycin C.

Fig. VI-2 : (a) Attachment index and
(b) Phagocytic index .. 199
of peritoneal macrophages at different days after inoculation of DV i.c. of mice treated with 2.5 μg of mitomycin C.
Fig. VI-3: (a) Attachment index and
(b) Phagocytic index
of peritoneal macrophages
at different days after inoculation of DV i.c. of mice
treated with cycloheximide.

Fig. VII-1: Effect of multiple doses of SF
on DV-induced alterations in
(a) Attachment, and
(b) Phagocytosis
of EA by macrophages.

Fig. VII-2: Effect of single dose of SF on
DV-induced alteration in
(a) Attachment and
(b) Phagocytosis
of EA by macrophages.

Fig. VII-3: Dose-response effect of SF on
DV-induced alterations in
(a) Attachment, and
(b) Phagocytosis
of EA by macrophages.

Fig. VII-4: Effect of SF on CF-induced
alterations in
(a) Attachment, and
(b) Phagocytosis
of EA by macrophages.
(c) Normal control mice.
