<tbody>
<tr>
<td>4.1.1</td>
<td>Serum zinc level in surveyed pregnant women</td>
<td>77</td>
</tr>
<tr>
<td>4.1.2</td>
<td>Serum retinol level in surveyed pregnant women</td>
<td>79</td>
</tr>
<tr>
<td>4.2.1</td>
<td>Distribution of the 500 subjects according to Zinc and Vitamin A deficiency together</td>
<td>80</td>
</tr>
<tr>
<td>4.3.1</td>
<td>Distribution of selected subjects according to general profile</td>
<td>82</td>
</tr>
<tr>
<td>4.4.1</td>
<td>Distribution of selected subjects according to reproductive history</td>
<td>85</td>
</tr>
<tr>
<td>4.5.1</td>
<td>Distribution of Selected subjects according to Clinical Information</td>
<td>94</td>
</tr>
<tr>
<td>4.6.1</td>
<td>Distribution of selected subjects according to the anthropometric parameters</td>
<td>97</td>
</tr>
<tr>
<td>4.7.1</td>
<td>Distribution of selected subjects according to dietary information</td>
<td>99</td>
</tr>
<tr>
<td>4.8.1</td>
<td>Mean±SD dietary zinc intake of the selected subjects before and after feeding trial.</td>
<td>102</td>
</tr>
<tr>
<td>4.8.2</td>
<td>Analysis of variance for dietary zinc intake of selected pregnant women before and after feeding intervention</td>
<td>104</td>
</tr>
<tr>
<td>4.8.3</td>
<td>Multiple comparisons for dietary zinc intake of selected pregnant women after experimental trial (Bonferroni)</td>
<td>104</td>
</tr>
<tr>
<td>4.8.4</td>
<td>Mean±SD dietary vitamin A intake of the selected subjects before and after feeding trial.</td>
<td>105</td>
</tr>
<tr>
<td>4.8.5</td>
<td>Analysis of variance for dietary vitamin A intake of selected pregnant women before and after feeding supplements</td>
<td>107</td>
</tr>
<tr>
<td>4.8.6</td>
<td>Multiple comparisons for dietary vitamin A intake of selected pregnant women after experimental trial (Bonferroni)</td>
<td>107</td>

</tbody>
</table>
4.9.1 Mean (± SD) serum zinc levels of selected subjects before and after feeding interventions

4.9.2 Analysis of variance for serum zinc level of selected pregnant women before and after feeding interventions

4.9.3 Multiple comparisons for serum zinc of selected pregnant women after experimental trial (Bonferroni)

4.9.4 Mean (± SD) serum retinol levels of selected subjects before and after feeding interventions

4.9.5 Analysis of variance for serum retinol of selected pregnant women before and after giving supplements

4.9.6 Multiple comparisons for serum retinol of selected pregnant women after experimental trial (Bonferroni)

4.10.1 Mean ± SD of Gain in weight (kg) of the selected subjects from enrolment till the end of supplementation trial.

4.10.2 Analysis of variance of weight gain (kg) in selected subjects from enrolment till the end of supplementation trial.

4.10.3 Multiple comparisons in weight gain (kg) of selected subjects from enrolment till the end of supplementation trial (Bonferroni)

4.11.1 Mean (±SD) Gestational age (weeks) of neonates in selected subjects

4.11.2 Analysis of variance for gestational age (weeks) of neonates in selected subjects

4.11.3 Multiple comparison for gestational age (weeks) of neonates of selected subjects (Bonferroni)

4.12.1 Mean (±SD) Birth weight (kg) of neonates of selected subjects

4.12.2 Analysis of variance for birth weight (kg) of neonates of selected subjects

4.12.3 Multiple comparison for birth weight (kg) of neonates of selected subjects (Bonferroni)

4.12.4 Distribution of different experimental groups according to the birth weight of neonates.

4.13.1 Mean (±SD) Head circumference (cm) of neonates of selected subjects
4.13.2 Analysis of variance for head circumference (cm) of neonates of selected subjects

4.13.3 Multiple comparison for head circumference (cm) of neonates of selected subjects (Bonferroni)

4.13.4 Distribution of different experimental groups according to the head circumference of neonate

4.14.1 Mean (±SD) chest circumference (cm) of neonates of selected subjects

4.14.2 Analysis of Variance for Chest Circumference (cm) of Neonates of Selected Subjects

4.14.3 Multiple comparison for chest circumference (cm) of neonates of selected subjects (Bonferroni)

4.14.4 Distribution of different experimental groups according to the chest circumference of neonate

4.15.1 Mean (±SD) Length (cm) of neonates of Selected Subjects

4.15.2 Analysis of variance for length (cm) of neonates of selected subjects

4.15.3 Multiple comparison for length (cm) of neonates of selected subjects (Bonferroni)

4.15.4 Distribution of different experimental groups according to the length of the neonate

4.16.1 Distribution of different experimental group according to the term of delivery

4.17.1 Distribution of different experimental group according to the type of delivery.

4.18.1 Distribution of different experimental groups according to the incidences of diarrhea (under three months observations).

4.19.1 Distribution of cough incidences (under three months observation) of infants among different experimental groups

4.20.1 Correlation of percent change in serum zinc and serum retinol with different neonatal outcomes.

4.21.1 Relative risk of different adverse pregnancy and newborn outcomes
4.22.1 Zinc Content (mg/100g) of commonly grown and consumed foods of Kurukshetra District.

4.22.2 Zinc content of commonly consumed but not grown foods of Kurukshetra District (mg/100g)

4.22.3 β-carotene content of commonly grown and consumed cereals and pulses of Kurukshetra district (µg/100g)

4.22.4 β-carotene content of commonly grown and consumed fresh vegetables of Kurukshetra district (µg/100g)

4.22.5 β-carotene content of commonly grown and consumed fresh fruits of Kurukshetra district (µg/100g)

4.22.6 β-carotene content of spices and condiments consumed in Kurukshetra district (µg/100g)

4.22.7 β-carotene(µg/100g ) content of milk and milk products consumed in Kurukshetra district
