Acknowledgments

A major research project like this can never be the work of anyone alone. The contributions of many different people, in their different ways, have made this possible. I extend my sincere gratitude to everyone who supported me during the entire course of my PhD work. I am grateful to them for their kind support, aspiring guidance, constructive criticism and friendly advice during the research work.

First and foremost, I would like to express my special appreciations and sincere thanks to my supervisors Prof. B.S. Kaith, Dr. B.K. Kapur and Dr. Susheel Kalia for sharing their truthful and illuminating views on a number of issues related to my topic of research and encouraging my research and allowing me to grow as a research scientist. Your advice on both research as well as on my career have been priceless. You have been a tremendous mentor for me and your personal inspiration to work with strong determination and dedication under adverse situations is lot to me. I have been blessed by their continuous moral support, invaluable inputs and suggestions when I needed the most. Indeed, without their technical guidance, significant contribution and moral support, the present work would never have seen the light of the day.

In particular, I would like to place on record my profound gratitude to Prof. B.S. Kaith for his extreme support, remarkable guidance and practical advice throughout this investigation. His pain-staking efforts in careful proof reading the thesis drafts, countless reviews of my research work, help me understand research fundamentals and enriching new ideas in me are highly appreciated. He is one of the best teachers that I have had in my life. He sets high standards for his students and he encourages and guides them to meet those standards. He taught me new concepts and ways to explore the work towards fruitful conclusions and have offered much advice and insight throughout this investigation.

I am privileged to the Vice Chancellor and other academic and administrative fraternity of Shoolini University, Solan to get their complete autonomy and good academic environment to pursue the work at different places without any restriction which enables me in the right directions. I have the honor to have the invaluable inputs, useful suggestions and kindness from all the esteemed Faculty and Staff Members and PhD Scholars of Chemistry Department.

I wish to extend my sincere thanks to the Director, Inter University Accelerator Centre (IUAC), New Delhi, for rendering me the experimental facilities time-and-again to carry out this research work. Specially, I have been fortunate to receive the kind support and
guidance from Dr. SP Locharb and Mr. Birendra Singh at all times. I also wish to thank the Pelletron Staff of IUAC for their assistance during the beam time experiment.

I am also grateful to the Director and especially to the Head of Chemistry Department, Dr. B. R. Ambedkar National Institute of Technology (NIT), Jalandhar for giving me the opportunity to work in their laboratories and providing me with all sorts of facilities. I am indebted to all the Faculty Members and Lab mates of Chemistry Department of NITJ for supporting my work.

Thanks are also due to Prof. Hendrik C Swart, Department of Physics, who introduced me to University of the Free State (UFS), South Africa, and formally offered me to carry out partial work in his lab. The help and thoughtfulness of all the Staff Members, Postdoc Researchers and PhD Students in the UFS is gratefully acknowledged.

I had the pleasure to work with many young Scientists. In particular, I would like to thank Dr. Hemant Mittal, Dr. Vinod Kumar, Dr. Sudipta Som, Dr. Mukut Gohain, Dr. Rakesh Kumar Rana, Mrs. Saruchi, Dr. MM Duvenhage and Dr. Pravin Kumar for their research contributions, kind cooperation, technical help and frequent discussions on related topics that helped me improve my knowledge in this area.

Last but not least, I would like to thank my parents and family for their unconditional support, both financially and emotionally throughout my PhD. They were always stood by my decision and provided me all the resources even in difficult times to help me achieve my goals and realize my dreams.

At the end, I would like to express great appreciations to my beloved husband Dr. Vijay Kumar who had spent sleepless nights and was always my first support in the moments when there was no one to answer my queries. Words would not be sufficed for all of the sacrifices that he had made on my behalf. His prayer for me was what sustained me so far. Thank you for being a better half of my life.

Above all, I owe and dedicate everything to the Almighty GOD for the strength, wisdom and perseverance that he had bestowed upon me during this research project, and indeed, throughout my life.

I am indebted to all those people who have made this dissertation possible and because of whom this research experience and wonderful journey shall remain everlasting and cherished forever in my sweet memories.

Thanks to all of you!

(Kasha)
