TABLE OF CONTENTS

1. Literature Review 1-72
   1.1 Free radicals 1
   1.2 Antioxidants 8
   1.3 Ethnobotany of Family Araceae 18
      1.3.1 Genus - *Amorphophallus* 19
      1.3.2 Plant - *A.paeoniifolius* 21
   1.4 Review of literature of *A.paeoniifolius* 28
   1.5 Review on organ toxicity
      1.5.1 Hepatotoxicity 30
      1.5.2 Nephrotoxicity 47
      1.5.3 Gastric ulceration 65

2. Objectives and Plan of work 73-77

3. Pharmacognostical investigation profile 80-92
   Methodology
   3.1. Plant Materials
      3.1.1. Macromorphological evaluation 80
      3.1.2. Microscopic evaluation
         3.1.2.1. Anatomy of Aerial parts 80
         3.1.2.2. Anatomy of underground parts 82
         3.1.2.3. Powder characteristics of corm. 82
         3.1.2.4. Determination of leaf surface data 82
         3.1.2.5. Determination of number, dimension of starch grains 85
   3.2. Standardisation of Corm powder
      3.2.1. Determination of foreign mater 86
      3.2.2. Determination of proximate values 87

4. Results : Pharmacognostical investigation 93-103

5. Phytochemical investigation profile 104-125
   Methodology
   5.1 Extraction
      5.1.1. Successive solvent extraction 104
      5.1.2. Hydro-Alcoholic extraction 104
      5.1.3. Methanolic extraction 105
   5.2. Phytochemical analysis of various extract
      5.2.1. Preliminary qualitative tests 105
      5.2.2. Fluorescence analysis and colour reactions 113
      5.2.3. Chromatographic studies
         5.2.3.1. Qualitative TLC analysis 115
         5.2.3.2. HPTLC Finger print analysis 116
         5.2.4. Mass spectroscopic analysis 119
   5.3. Isolation and characterization Phenolic compounds 120
6. Results: Phytochemical investigation 126-157

7. Pharmacological investigation profile 158-194

**Methodology - in vitro studies**

7.1. Comparative in vitro estimations
   7.1.1. Total Phenolic Content 158
   7.1.2. Total Flavonoid Content 159
   7.1.3. Total antioxidant capacity 160
   7.1.4. DPPH radical scavenging 161
   7.1.5. Hydroxyl radical scavenging 162
   7.1.6. Reducing power assay 164
   7.1.7. Nitric oxide radical scavenging 165

7.2 Anti microbial activity 166-169

**Methodology - in vivo studies**

7.3 Acute toxicity studies 170

7.4 Organ protective activities
   7.4.1 Evaluation of Hepatoprotective activity in
       7.4.1.1. CCl₄ induced toxicity 172
       7.4.1.2. Paracetamol induced toxicity 181
       7.4.1.3. Thioacetamide induced toxicity 182
   7.4.2 Evaluation of Nephroprotective activity in
       7.4.2.1. Cisplatin induced toxicity 184
       7.4.2.2. Gentamicin induced toxicity 188
       7.4.2.3. Paracetamol induced toxicity 189
   7.4.3. Evaluation of Gastro protective activity in
       7.4.3.1. Indomethacin induced ulceration 190
       7.4.3.2. Ethanol induced ulceration 192
       7.4.3.3. Pyloric ligated ulceration 193

8. Results: in vitro studies 195-205

   in vivo studies 206-274

Discussion 276-293

Conclusion 294-295
