Acknowledgements

I am expressing my heartfelt gratitude to Dr. John Thomas K., Reader, Animal Behaviour and Wetland Research Laboratory, Department of Zoology, Christ College, Irinjalakuda for guiding me during the whole course of the work with love and care of a father. His keen interest and selfless training made me able to think, design experiments and instruments, as well as to take up cognitive abilities of fishes as my topic of research. The lessons of deep ecology, principles of self organization and holistic approach to life which I imbibed from him, widened my knowledge from the narrow band of biochemistry and entomology to the holistic perception of behaviour, neuroscience and conservation biology.

I am grateful to the Principal of Christ College Irinjalakuda, Kerala, for providing necessary facilities for the completion of my work.

Prof. N.N. Gokuldas, my teacher and former Head of the Department of Zoology, Sree Krishna College, Guruvayur, focused my attention to science and inspired me to do research. It was through our long discussions I learned that scientific research is a matchless activity. Dear Sir, following your foot prints I reached up to this moment.

I am indebted to Prof. G. Marimuthu, Head of the Department of Animal Behaviour and Physiology, Madurai Kamaraj University, Madurai, for all the helps, suggestions and opportunities given to me during the whole course of work.
I am grateful to Prof. Anindya Sinha, Professor, National Institute of Advanced Studies, whose suggestions, and constant discussions that riveted my thoughts and works to the field of cognitive science. Moreover, his critical evaluation and comments on my works, during the whole course of study, enriched me a lot and helped me to sharpen my thoughts in the field of cognitive science and conservation biology.

Thanks are due to Prof. Nichola S. Clayton, Professor and Head, Department of Psychology, Cambridge University, England for finding time in her very busy schedule to comment and correct my manuscripts.

I express my gratitude Prof. Raghavendra Ghadagkar, Centre for Ecological Sciences, Indian Institute of Sciences, Bangalore for giving me an intense training in behavioural ecology.

I thank Prof. Nishikanth Subedar, Department of Pharmaceutical Sciences, Nagpur University, Nagpur, for teaching me the skills to trace cyto-architecture of brain and techniques of molecular neuroscience. That intense training extended my view over the horizon of behaviour and helped me to understand the neurophysiological mechanism coordinating and controlling behaviours.

Another vital area of animal behaviour, the control and coordination of the behaviour by ‘Time’ (Chronobiology) was made familiar to me during the 5th SERC School in Chronobiology. I express my sincere gratitude to the organizers for the
excellent training I had during the school. The names of Prof. Vinod Kumar, Dept. of Zoology, Lucknow University, Lucknow; Dr. Sangeetha Rani, Reader, IRPHA unit on Chronobiology, Lucknow University, Lucknow, Prof. A.K. Pati, Pandit Ravishankar Shukla University, Raipur; Prof. Sanjaykumar Bharadwaj, Chowdari Charansing University Meerut are remembered with gratitude and respect.

Prof. Jayaram, Director, Interdisciplinary Scientific Research and Development Organization (ISRDO), Irinjalakuda, is specially acknowledged here for the training given to me in designing and developing instruments used for the quantification of behaviour. Discussions with him on various subjects have enriched my knowledge. I acknowledge all members of ISRDO, especially, Mr. Jiffy, for the help, support and encouragement.

The selection and application of proper statistics was an extremely difficult issue during the initial phase of my research. Rev. Fr. (Dr). T.V. Varghese (Late), Dept. of Mathematics and Statistics, Christ College, Irinjalakuda, taught me the methods of statistics patiently from the fundamentals to the advanced level. His classes and his genius is remembered and acknowledged with tears.

Christ College library my second home is actually a place of pleasure and inspiration for me. All staff members helped me and considered my interests selflessly to their maxim. Without their help and support, completion of this work might have been a difficult job. I thank Librarian, Mr. Varghese and the staff members, Davis, Joy, Baby,
Elizabeth and Liju, though; the words are often incapable to express my gratitude to them.

Throughout the whole course of the study in Christ College, Prof. Sebastian Joseph, Dept. of Malayalam and Fr. Joy Peenikaparambil, Dept. of B.P.E. and, Warden of Christ College hostel helped me a lot. Their brotherly care, advice and inspiration were matchless. They helped me selflessly in many occasions and I express my heartfelt gratitude and indebtedness to them.

Thanks are due to Mr. Dony Paul for typing the Thesis and other manuscripts excellently. It was his patience and skill that made it possible for me to complete the D.T.P. works in time.

I thank my intimate friends and classmates, Adv. Jayesh K.U., Panel Advocate, Govt. of India, New Delhi, Adv. Subhashchandran, Indian Law Institute, New Delhi, Jagadeesh Kumar, General manager, Subway India, Chennai, Praveen Balakrishnan, Manager, Bharathi Axa, Mumbai for their support and encouragement from my pre-university days onwards.

My brothers Adhem Shahin, Tom Kiron, Anooj, Shabeer, Anoop Mathew and John Shiron are thanked for their comradeship, help, support and inspiration given me during the whole course of study. Support of Mr. Sebastian and Siby K.K. are also acknowledged.
All my teachers and students in the field of Martial Arts are acknowledged for their support and prayers. Especially the names of my students Raj Kiran, Muhammed Mustafa and Anand P. Sidharth are remembered with gratitude. The philosophy, courage, tolerance, patience provided by the martial art helped me to overcome all challenges.

Helps provided by Dr. Francis Kakkassery, St. Thomas College, Thrissur, Prof. C.K.G. Nair, Director, Kerala Limnological Research Institute, Irinjalakuda, Prof. T.C.Narendhran, Systematic Entomology Lab, Department of Zoology, Calicut University, Calicut, Dr. Subhash Babu, CUSAT, Sanilkumar, CUSAT, Kochin; Raju Varghese and Francis Jacob are also acknowledged.

Mr. Benny and Mr. Joshy of our lab collected the fishes, arranged the materials for the experiments and were ready and available at any time to provide all helps for the success of my experiments. Their helps and kindness are remembered with gratitude.

All the teachers and students of Dept. of Zoology, Christ College, Irinjalakuda and my colleagues of Animal Behaviour and Wetlands Research Laboratory are acknowledged for their all sorts of help during the whole course of study. My juniors Sheenaja and Raji are also acknowledged for their support.

Our Non-teaching staffs Joesettan, Mathewsettan, Raviyettan and Sabuvettan are thanked for their helps.
My mother, my father, my brother Aneesh, sister Sumitha and niece Aiswarya are acknowledge for their patience, support and encouragements, which helped me to complete this work. Without their support and prayers, I could not have overcame the sever health problems faced during the study period.

Finally, I am indebted to the Lord Almighty for sending me back to life and making it possible to complete the works. It was only ‘Thou’ made it possible to tide over all the obstacles and negative spirits came into my way as well as to swim over the difficult period of ill health. Thank you Lord, Thank you very much.
