Acknowledgement

Foremost, I would like to express my sincere gratitude to my Thesis advisor Dr. G. Prema, for the continuous support of my Ph.D study and research, for her patience, motivation, enthusiasm, and immense knowledge. Her guidance helped me in all the time of research and writing of this thesis. I admit that this thesis would not have been in the present form without her care for depth and subtlety, especially for the detailed presentation of my investigations in the thesis. I could not have imagined having a better advisor and mentor for my Ph.D study.

I sincerely express my deeply indebtedness to my DST project supervisor Dr. B. S. Kiranagi, Department of Mathematics, University of Mysore for his invaluable guidance, eminent supervision, loving encouragement, critical suggestions and meticulous care throughout my research career. His wisdom, knowledge and commitment to the highest standards inspired and motivated me. His guidance helped me in all the time of research and writing of this thesis.

I sincerely express my gratitude to Br. Abhayamrita Chaitanya, Pro-Chancellor, Dr. P. Venkat Rangan, Vice-Chancellor and Dr. S. Krishnamoorthy, Registrar, Amrita Vishwa Vidyapeetham, for permitting me to pursue my research programme in Amrita Vishwa Vidyapeetham and providing all the required facilities.

I am very much thankful to Dr. Sasangan Ramanathan, Dean, School of
Engineering and Dr. Bharath Jayaram, Dean, Post Graduate Programmes for giving me proper directions in pursuing my research programme.

I especially thank to Dr. M. P. Chandrasekharan, former Dean, School of Engineering and Dr. N. S. Pandian, former Dean, Post Graduate Programmes for the generous support and advice given during the early stages of my research work.

I would like to thank Dr. K. Somasundaram, the convener (Doctoral committee) and Chairperson, Department of Mathematics and Dr. S. Mahadevan, Member (Doctoral committee) and Chairperson, Department of Physics, Amrita School of Engineering for their constant encouragement and insightful comments.

I would like to thank Prof. R. Sundararajan, Electronics and Communication Engineering, Amrita School of Engineering, for his love and encouragement throughout my research work.

I am thankful to Dr. K. Shailendhra, for his invaluable suggestions in formatting the introduction and the thesis.

I would like to thank all faculty members, friends and research colleagues of Department of Mathematics, Amrita School of Engineering for their support and good wishes.

I am greatly thankful to my teacher Dr. Chandrashekara Adiga, Professor, Department of Mathematics, University of Mysore, Manasagangotri, Mysore for his constant encouragement and suggestions throughout my research work and for enabling me pursue my research programme at Amrita Vishwa Vidyapeetham.
I would like to thank all the faculty members, my friends and research colleagues of Department of Mathematics, University of Mysore, Mysore, for their help and support rendered during my stay at the University of Mysore.

I take this opportunity to sincerely acknowledge the Department of Science and Technology(DST), New Delhi, India, for granting the research fellowship to work in the project “Algebra Bundles (Alternative, Lie, Jordan)” (SR/S4/MS:550/08, undertaken by Dr. B. S. Kiranagi (Principal Investigator) and Dr. G. Prema (Co-Investigator) during 2009-2013, was very helpful for the successful completion of this work.

I am extremely grateful to Prof. B. K. Ramesh, IIT Department, Jain college, Bangalore, for his support.

I express my deep sense of love and gratitude to my mother, father, and sister. My hard-working parents have sacrificed their lives for my sister and myself and provided unconditional love and care. I love them so much, and I would not have made it this far without them. My sister has been my best friend and I love her dearly and thank her for all her advice and support.

(Ranjitha Kumar)
