Acknowledgement

There are a number of people without whom this thesis might not have been written, and to whom I am greatly indebted.

First and foremost I would like to express my sincere gratitude towards my thesis advisor Dr. Deepthy Menon, especially for believing in me. Without her patient guidance, motivation and support this dissertation would not have been completed. I’ll always be grateful to her for all the help, mentoring and timely support extended to me.

I am grateful to Prof. Shantikumar V Nair, the Director, Amrita Centre for Nanosciences and Molecular Medicine (ACNSMM) for providing me an opportunity to be a part of this wonderful institution and for his valuable comments and suggestions as a member of my doctoral committee.

I express my sincere thanks to my Co-advisor Dr. Krishnaprasad C, for his guidance, insightful comments and fruitful discussions with him, which were especially useful for the completion of my thesis.

I gratefully remember Late Dr. K.K. Haridas (Former HOD, Dept. of cardiology, Amrita Institute of Medical Sciences) who was my clinical advisor at the initial phases of my PhD work. His genuine inputs and guidance helped me significantly in shaping up my thesis.

I am obliged to Dr. M. Vijayakumar, Interventional Cardiologist, Amrita Institute of Medical Sciences, for his willingness to discuss and make valuable suggestions despite his busy schedules. The remarkable knowledge he hold in his field have particularly helped me to derive a clinical perspective of my thesis work.
I also thank Prof. Manzoor Koyakutty, for all his timely support, and valuable comments for scientifically analyzing the results during the doctoral committee meetings.

I wish to extend my sincere acknowledgement to all faculty members of ACNSMM, for their support and suggestions during my research period.

I’m grateful to Mr. Sajin P Ravi, Mrs. Sreerekha, Mr. Sarath S, Ms. Sreeja V Nair and Girish CM, for their technical support in Scanning electron microscopy, Flow cytometry, XPS, confocal microscopy and AFM. I also thank my colleague John Joseph for all help rendered to me.

I thankfully remember the kindness of Meryl Life Sciences Pvt Ltd, Gujarat, India for providing me with free sample coronary stents which was utilized for the entire study. I also thank Ms Karuna, IIT Mumbai for her assistance in nanoindentation and nanoscratch testing. Mr. Sanal, Dept of Physics CUSAT is acknowledged for the glancing angle XRD and Dr. Adersh, STIC, CUSAT for the ICP AES analysis.

I thank Dr. Sujish, Mr. Muralidharan CV, Engineer G & SIC, Device Testing laboratory, Sree Chitra Tirunal Institute of Medical Sciences and Technology for their help in stent testing and valuable suggestions for my thesis work.

I also acknowledge Department of Science and Technology, Government of India for the initial financial support for the work. I am gratefully to Department of Biotechnology, Government of India for rendering financial help through a Senior Research Fellowship for the completion of my thesis work.

I express my deep sense of gratitude to Amrita Vishwa Vidyapeetham, for providing substantial infrastructure support for the research work.
My beloved friends Soumya S and Dhanya Narayanan, thank you both of you for your understanding and encouragement in my many moments of crisis. I also thank all my lab members for their sincere co-operation and critical inputs which helped me for the betterment of my thesis work. To all my dear friends, no one is forgotten although not mentioned. Your friendship has been a wonderful experiences my life.

The most important thanks go to my family. My parents, who are always there for me to facilitate anything and everything I needed. I bow before the unconditional love and sacrifices you have made for fulfilling my dreams, more over it’s your dream come true!

To my dearest husband, you have been such a great companion all these years. You have been there for me during my good and bad times. Thank you for your continued, unfailing love and understanding which made me sail till the end and complete my thesis work.

I also remember my beloved sister and all my relatives for their appreciation, encouragement and prayers for me all the time.

Thank you, Lord, for always being there for me.

This thesis is just a beginning of my journey!
