1.5 Conduction in Organic Solids ........................................ 23
1.5(a) Carrier Generation Mechanism ............................ 23
1.5(b) Carrier Recombination and Trapping ....................... 27
1.5(c) Mechanism of Carrier Transport ................................ 28
1.6 Dielectric constant and Loss Angle Tangent ................. 30
1.7 Statement of Problem .................................................. 32

CHAPTER II

2. ELECTRICAL CONDUCTIVITY OF IMPURE ACENAPHTHENE .......... 35
2.1 Introduction ..................................................... 35
2.2 Factors Affecting Electrical Conductivity ....................... 35
2.3 Present Experimental Technique ................................ 41
2.4 Details of the Calculations ...................................... 45
2.5 Results .................................................................... 48
2.5A - Variation of Current and Conductivity with field ............ 48
2.5B - Variation of Current and Conductivity with temperature ..... 50

CHAPTER III

3. ELECTRICAL CONDUCTIVITY OF ZONE-REFINED ACENAPHTHENE .... 54
3.1 Introduction .......................................................... 54
3.1(i) Zone-Refining .................................................... 55
3.2 Experimental Techniques .......................................... 56
3.3 Present Experimental Techniques .................................. 57
3.4 Determination of Purity ............................................ 57
3.5 Results

3.5A - Variation of Current and Conductivity with Field .. 59

3.5B - Variation of Current and Conductivity with Temperature .. 62

CHAPTER IV

4. THERMOELECTRET SURFACE CHARGE MEASUREMENT 66

4.1 Introduction .. 66

4.2 General Method of Thermoelectret Preparation .. 68

4.3 Present Method of Preparation thermoelectrets 69

4.3(A) Assembly for the Preparation of Sample and Thermoelectrets .. 69

4.3(B) Method of Preparation of Samples .. 71

4.3(C) Preparation of Thermoelectret .. 72

4.3(D) Preservation of Thermoelectret .. 73

4.3(E) Charge Measurement .. 73

4.4 Present Technique .. 73

4.5 Electrometer .. 74

4.6 Results .. 77

CHAPTER V

5. Thermal Depolarization of Acenaphthene Thermoelectret .. 80

5.1 Introduction .. 80

5.2 Experimental Arrangement and Details of Measurement .. 82

5.3 Heating Rate .. 83
5.4 Results
   5.4(A) Isothermal Discharge Current .. 83
   5.4(B) Thermally Stimulated Depolarization Current .. 84

   CHAPTER VI

6. PHOTO DEPOLARIZATION OF ACENAPHTHENE PHOTOELECTRETS .. 87
   6.1 Introduction .. 87
   6.2 General Method of Preparation of Photoelectrets .. 89
   6.3 Present Method of Investigation .. 90
   6.4 Method of Current Measurement .. 92
   6.5 Results .. 93
       6.5(a) Effect of Polarizing Field .. 93
       6.5(b) Effect of Polarizing Time .. 94
       6.5(c) Effect of Polarizing Field Reversal .. 95

   CHAPTER VII

7. DIELECTRIC CONSTANT .. 100
   7.1 Introduction .. 100
   7.2 Parameters Influencing Dielectric constant 101
       7.2(i) Temperature Dependence .. 101
       7.2(ii) Frequency Dependence .. 102
       7.2(iii) Field Dependence .. 103
   7.3 General Measurement Techniques .. 104
   7.4 Present Experimental Techniques for Measurement of Dielectric Constant .. 105
   7.5 Details of Measurements .. 112
7.6 Results

7.6(A) Variation of Dielectric Constant with Temperature

7.6(B) Variation of Dielectric Constant with Frequency

CHAPTER VIII

8. DISCUSSION OF RESULTS AND CONCLUSIONS

8.1 Electrical Conductivity

8.2 Isothermal Discharge Current and Thermally Stimulated Current

8.3 Thermoelectret Surface Charge Measurement

8.4 Photodepolarization Current

8.5 Dielectric Constant

8.6 Conclusion

REFERENCES
