ACKNOWLEDGEMENT

I express deep sense of gratitude and indebtedness to my supervisor, Dr. J.D. Ranade, M.Sc., Ph.D., (London), Reader, Department of Physics, University of Saugar, for his constant encouragement and interest in the work and helpful suggestions and criticisms from time to time. I am greatly thankful to Professor D.R. Bhawalkar, M.Sc., Ph.D (London), Prof. and Head of Physics department, University of Saugar, for providing me all facilities for carrying out this work.

My sincere thanks are due to Dr. A.P. Srivastava, Dr. S. Sivaraman, Dr. P.S. Diwan and Dr. B.L. Sharma, of Physics Department, University of Saugar, for their kind help during the tenure of this work. My friends and fellow research workers extended their cooperation to me whenever needed. I thank them profoundly, particularly to Shri S.L. Mor and Shri A.K. Chakravarti.

I am grateful to Ministry of Education, Govt. of India for the award of a research Training scholarship which enabled me to undertake this work.

B.K. Kathal
(22.6.68)

Department of Physics, University of Saugar, Saugor (M.P.) India.
