CONTENTS

CHAPTER I

1. INTRODUCTION ... 1

1.A Purification ... 3
  1.A.1 Sublimation ... 3
  1.A.2 Chromatography ... 4
  1.A.3 Zone-Refining ... 5

1.B Electrical Conductivity ... 5
  1.B.1 Energy Level Diagram of the Crystal ... 6
  1.B.2 Carrier Generation Mechanism ... 8
  1.B.3 Carrier Recombination and Trapping ... 17
  1.B.4 Mechanism of Carrier Transport ... 13

1.C Pressure Dependence of Electrical Conductivity ... 23

1.D Persistent Internal Polarization ... 24
  1.D.1 Brief Survey ... 26
  1.D.2 Life-Time of Internal Polarization in Photoelectrets ... 27
  1.D.3 Theories ... 30
  1.D.4 Reciprocity Law ... 31
1.E Dielectric Constant ... 36
  1.E.1 Dielectric Relaxation Time ... 37
  1.E.2 Dielectric Loss ... 38
1.F Luminescence ... 41
1.G Present Problem ... 42

CHAPTER II

2. PURIFICATION (ZONE-REFINING) ... 47
2.A Introduction ... 47
2.B Theory of Zone-Refining ... 48
  2.B.1 Equilibrium Freezing ... 49
  2.B.2 Zone-Refining ... 50
2.C Experimental Techniques ... 53
2.D Present Experimental Technique ... 55
  2.D.1 Six Sample Zone-Refining Apparatus ... 56
  2.D.2 Control of Zone-Refiner Speed ... 58
  2.D.3 Temperature Control of Heater ... 58
  2.D.4 Procedure of Operation ... 58
CHAPTER III

3. ELECTRICAL CONDUCTIVITY - I ... 62

3.A Introduction ... 62

3.B Dependence of Dark Electrical Conductivity on Various Factors ... 62

3.C Experimental Techniques for Conductivity Measurement ... 70

3.D Present Experimental Technique ... 72

3.E Details of Measurement ... 73

3.F Calculations ... 79

3.G Results ... 82

3.G.1 Variation of Current and Conductivity with Field ... 82

3.G.2 Variation of Current and Conductivity with Temperature ... 84

CHAPTER IV

4. ELECTRICAL CONDUCTIVITY - II ... 90

4.A Introduction ... 90

4.B Pressure ... 90

4.B.1 Electrical Conductivity ... 91

4.B.2 Band Structure ... 94

4.B.3 Spectral Properties ... 96

4.C Techniques for Pressure Generation ... 97
CHAPTER V

5. PERSISTENT INTERNAL POLARIZATION ... 113
5.A Introduction ... 113
5.B Factors Affecting Photoelectret Behaviour ... 115
5.C General Preparation Methods and Measurement Techniques ... 120
5.C.1 Discharge Current Measurements ... 121
5.C.2 Surface Charge Measurements ... 122
5.D. Present Measurement Technique ... 123
5.E Results ... 131
5.E.1 Dark and Photo-Polarization ... 131
5.E.2 Field Reversal Photo-Polarization ... 133
5.E.3 Comparison ... 134

CHAPTER VI

6. DIELECTRIC CONSTANT ... 136
6.A Introduction ... 136
6.B Parameters Influencing Dielectric Constant ... 137
6.C General Measurement Techniques ... 142
6.D Present Technique ... 144
6.E Details of Measurement ... 150
6.F Results ... 152
6.F.1 Variation of Dielectric Constant and Loss with Temperature at Fixed Frequency ... 152
6.F.2 Variation of Dielectric Constant and Loss with Frequency at Fixed Temperature ... 153

CHAPTER VII

7. FLUORESCENCE ... 155
7.A Introduction ... 155
7.B Emission Spectra ... 155
7.B.1 Absorption ... 157
7.B.2 Fluorescence ........................................ 158
7.B.3 Studies of Fluorescence Spectra ................. 161
7.C. Experimental Methods .................................. 162
7.D. Present Experimental Arrangement ................. 164
7.E Results .................................................. 166

CHAPTER VIII

8. DISCUSSION OF RESULTS AND CONCLUSIONS ........ 168
8.A Introduction .............................................. 168
8.B Purification ............................................. 168
8.C Electrical Conductivity .................................. 169
8.D Persistent Internal Polarization ....................... 194
8.E Dielectric Constant ..................................... 203
8.F Fluorescence ............................................. 207
8.G Conclusions .............................................. 214-220
