I would also like to thank all the people who have been involved directly or indirectly in the success of this work.

Words fall short when it comes to tell my loving and super-intellectual wife Shikha. It was solely her motivation, encouragement and belief in me that made me believe to pursue the Ph.D work. She has supported me all through the thick and thin of life so far. She made me...
believe that we would accomplish many more things if we did not think of them as impossible. I have seen, thinking becoming things through her eyes.

I can’t forget the love, affection and support of my sweet angel son “Darsh”.

Finally, I would like to thank “GOD” for all the small miracles and to accumulate it to become the bigger miracles of my life. Over the years, you have made me come out of that wishful thinking or imaginary craziness and helped me have a deeper understanding of my existence.
