Acknowledgement

First and above all, I praise God, the almighty for providing the opportunity and granting me the capability to achieve the goals successfully. I find myself short of vocabulary as I try to pay my respects to those who have made a huge contribution in the accomplishment of my thesis. Every story has several unsung heroes and mine is no different.

I would like to take the opportunity to express my sincerest gratitude to Prof. R.B. Subramanian, BRD School Of Biosciences, Sardar Patel University, Vallabhb Vidyvanagar, my mentor, to accept me as a PhD student. This work is all because of his warm encouragement, thoughtful guidance, enthusiasm, patience and immense knowledge. I could not have imagined having a better advisor and mentor for my Ph.D study who supported and allowed me to work in my own way. I shall be forever indebted to him for bestowing me with the opportunity to work in his research lab under his guidance.

I would like to express my heartfelt gratitude to Dr. Darshan Patel, Assistant professor, CHARUSAT University, Changa, Gujarat, India for his insightful discussions and developing an approach to a problem.
