Interdependence is a higher value than independence. The present work was possible only because of the efforts of various people who contributed to it in some form.

I consider myself fortunate and greatly privileged to have worked under the supervision and guidance of Dr. Anju P. Kunjadia, Associate Professor and Head, Department of Biotechnology, Ashok and Rita Patel Institute of Integrated Study and Research in Biotechnology and Allied Sciences (ARIBAS), New Vallabh Vidyanagar. Words can never express the high regards and love I have towards my guide. She treated me more like a son than as a student. The critical advices given have helped me to overcome many tough moments. She provided me invaluable and critical suggestions, scientific acumen perspicacious remarks, scholarly guidance, active persuasion and supervision, which served as a constant source of inspiration throughout the course of my study and research work. Without her support, I could not have completed my work in time. I pray that she gets all the best things in life.

I sincerely extend my gratefulness to Sophisticated Instrumentation Centre for Applied Research and Testing (SICART), Charutar Vidya Mandal (CVM) for providing the platform to carry out my researchwork successfully in their esteemed institute. I am equally grateful to Dr. Kirti Pawar, in charge Head, ARIBAS, for their generous attitude in providing necessary facilities to carry out the research work. I am also thankful to Dr. Pradip Patel, former Head, ARIBAS for their constant support and encouragement throughout the work.

I like to acknowledge the facility provided by Department of Animal Biotechnology, College of Veterinary Science and A.H., Anand to carry out research work on Metagenome sequencing. I wish to express my sincere gratitude to Prof. Chaitanya G. Joshi for initiating me into this fascinating field and exposing me to the world of scientific excellence. He has always been a father figure to me and his invaluable hints and active persuasion have been the major force behind completion of this study. The inspirational insightfulness, helpful comments, unflinching encouragement and stimulating
suggestions provided to me during my work at their department. Each passing day spent with him has made me a little more wiser than earlier.

I express my heart-felt gratitude to Dr. D. N. Rank, Professor & Head, Department of AGB, AAU, Anand, Dr. D. S. Nauriyal, Professor, Department of Veterinary Medicine, AAU, Anand, Dr. Prakash G. Koringa and Dr. Shubhash J. Jakhesara, Assistant Professor, Department of Animal Biotechnology, AAU, Anand for their consistent and invaluable inspirations and for their valuable suggestions during the research work.

I fail in words to express my earnest thanks to Dr. P. D. Kunjadia, Dr. A. K. Tripathi, Dr. U. V. Ramani, Dr. K. M. Singh and Dr. B. B. Bhandari for their technical help and support during the entire course of study.

Friends are part of life and without them life is vague. I can't forget love and affections received from my best friends on the way of completion, the friends who have shared the moments of laughter and sorrow can never be forgotten. I am immensely thankful to my colleagues Ramesh, Promise, Manisha, Jaina, Manisha sajnani, Drashti, Tejas, Anand, Nirmal, Nidhi, Bhakti, Mruduka, Ketan and Reena for their support and unreserved help during the course of study. Their diligent efforts made me consciously improve my own work standards. Bhupesh and Ronika have been great friends. Their help and support in innumerable ways has made me indebted to them. I thank them for their selflessness. My stay in V. V. Nagar has been extremely enjoyable with friends like them. I also thank them for tolerating my absurd ways.

No appropriate words could be traced in the presently available lexicon to express my gratefulness of beyond accountability to my adorable parents and grandparents who took pains and pains only to bring me to this stage. Their sacrifice surpasses all materialistic achievements. When heart is full and mouth is dumb, I have no words to express my gratefulness to my brother Keyur and sister Dhrati whose continuous inspiration, encouragement and affection, boosted up my moral during the period of study. Without their unconditional love it would have never been possible to make it.
The person who has shared the moments of laughter and sorrow can never be forgotten. I am really falling short of words to express my gratitude to my wife Preeti for her continuous inspiration and affection, boosted up my moral during the period of study. I feel indebted for her encouragement and smiling face that kept me patient in all the odds during my research.

No words of admiration can reply to all those dump animals who have contributed their blood and milk for this study.

And finally I thank God for everything he has given to me. Just no words, can feel his presence in my life.

Well, the list doesn’t stop here. In short, many people have contributed to this work in some way or the other. Thanks to all those who are missed here.

Vaibhav Bhatt
