Acknowledgement

I express deep sense of gratitude to my guide Dr. D. I. Brahmbhatt (Professor of Organic Chemistry, Department of Chemistry, Sardar Patel University) whose unreserved inspiration with keen interest and unfailing encouragement were the key forces behind the success of my efforts.

I am thankful to Head, Chemistry Department, Sardar Patel University for providing necessary research facilities.

I take this opportunity to pay respect and sincere thanks to Dr. B. H. Bhide (Retd. Professor of Chemistry, Department of Chemistry, Sardar Patel University) for valuable advices during my research progress.

I heartily acknowledge the valuable help of Dr. Samir Patel, Dr. Urvish Pandya, Dr. Chirag Patel, Dr. Jignesh Patel during the course of my research work.

I remember my colleagues Dr. Vishwesh Pandya, Dr. Mahesh Pandya, Dr. Mehul Patel, Dr. Ankit Kaneria, Dr. Kaushal Patel, Mr. Niraj Patel, Mr. Apoorva Patel, Mr. Chirag Patel and Mr. Varun Patel with gratitude for their unhesitating and most willing support which helped me a lot in the completion of my work.

I am indebted to Dr. Navin Talpada, micro analyst, chemistry department, for spectral analysis and Vaibhav Laboratories, Ahmedabad for IR spectral analysis. I would also like to extend thanks to Sandip Bhuva and Nilesh Thummar for antimicrobial activity.

I shall fail in my duty if I do not acknowledge the most willing help and cooperation shown by Dr. Atul Manvar.

I owe special thanks to Naresh, Ajay, Sanjay, Pritesh, Ritesh Khatri who have helped and support me generously.

I would like to express my vote of thanks to Darshan Jani, Mihir Patel, Nirav Shah and Jay Nirmal for their kind support.

My special grateful thanks are due to my beloved parents Late. Shri Kantilal Patel and Smt. Maniben Patel for their selfless love and constant support in my endeavor to carry out this research from beginning to end. I lack words to express my gratitude to my grand mother for her blessings and inspiration. The words are insufficient to express my gratitude to loving brother
Ashok who ungrudgingly shouldered my share of domestic responsibilities. I am also indebted to my sisters Alpa, Bhavana, Hiral for their constant encouragement in all my endeavor. I am also very much thankful to all my family members who have helped me directly or indirectly during my research tenure.

To my wife Bhavana and our child Dishank, all I can say is it would take another thesis to express my deep love for them. Their patience, love and encouragement have upheld me, particularly in those many days in which I spent more time with my chemistry than with them.

I bow down to the omnipresent almighty for the inexhaustible blessings which have enlightened my path.

Last but not the least, I express my gratitude and apologize to everyone whose contribution, I could not mention in this page.
