ACKNOWLEDGEMENTS

I express my heartily gratitude to ‘The Almighty’ for bestowing me to perform this work.

Foremost, I express my sincere gratitude to my guide and philosopher Dr. D. B. Choksi, Professor and the Head of Computer Science Department, Sardar Patel University; I am grateful to him for being with me during all the phases of my Ph. D. study. His approach with persistence, enthusiasm and immense knowledge, though a gentle nature has surely helped me to pursue the research work. I am thankful to the almighty for blessing me such a guide.

At this juncture, I remember and salute my late mother whose selfless sacrificial life and unceasing prayers only have enabled me to reach the present position of life. I am grateful to my father who not only planted the seed of idea to do research but also continuously encouraged me in attaining the same during this research work. I acknowledge him especially for being with me during my intermediary difficult days when I could not perform research work. I am thankful to the almighty for blessing me such parents.

I am also thankful to my wife for giving me all the support and patience during this research work.

I expand my thanks to Dr. O. S. Shrivastava (former head of computer science department at ISTAR), who motivated me and extended laboratory facilities to me to work during the beginning stage of my Ph. D. study.

Narayan A. Joshi
