Acknowledgements

“At this ecstatic time of presenting my Ph.D. thesis bow to almighty God”

Ph.D. is a long haul full of obstacles and barriers, but the support and encouragement of some people simply made this journey considerably pleased and easier. Here I want to give my acknowledgments to those who were always with me during this tenure.

In the first place, I would like to express my deepest and sincere gratitude to my worthy supervisor, Prof. Ranjana Aggarwal, Department of Chemistry, Kurukshetra University, Kurukshetra for her genial inspiration and enthusiastic encouragement throughout the course of my work. Her wide knowledge and positive attitude towards research and also towards life have been of great value for me. I always remember the tireless efforts that my supervisor has made over day and night in giving a good shape to this thesis. She is truly a hard working researcher and it is an honor for me to be one of her Ph.D. students.

With profound indebtedness, I owe my sincere thanks and deep regards to Dr. S. P. Singh, Professor Emeritus, Kurukshetra University, Kurukshetra for his immense interest, scholarly suggestions and timely support which helped me to improve throughout the present study.

I am grateful to Prof. A. Pal, Chairman, Department of Chemistry, Kurukshetra University, Kurukshetra for providing necessary research facilities. Thanks are also due to Prof. Om Prakash and Prof. R. C. Kamboj, Former Chairmen, Department of Chemistry, Kurukshetra University, Kurukshetra.

My sincere thanks are due to the staff at the Department of Chemistry, Kurukshetra University, Kurukshetra for all their help that made this work possible.

I thank Dr. Dhirender Kaushik, Assistant Professor, Institute of Pharmaceutical Sciences, Kurukshetra University for providing anti-inflammatory activity. I would like to acknowledge Dr. Ritu Mahajan, Associate Professor, Department of Biotechnology, Kurukshetra University for providing the antibacterial results. I
am indebted to Arpana Mittal, Department of Microbiology, Kurukshetra University for carrying out the antimicrobial activity.

I gratefully acknowledge our collaboration with Prof. Isabel Rozas, Trinity College, Dublin, Ireland for carrying out X-ray studies and biological testing of our compounds. I also thank Prof. Dionisia Sanz, Departamento de Quimica Organica y Bio-Organic, Facultad de Ciencias, UNED, Madrid, Spain for carrying out multinuclear magnetic resonance studies.

Acknowledgement is conveyed to my seniors Dr. Vinod Kumar, Dr. Garima Sumran and Dr. Rajiv Mittal for their guidance and indispensable help. I thank my labmates Eakta, Virender, Chinu, Sunil, Gulshan, Suresh and Swati for the healthy and warm discussions and to make Lab a convivial place to work.

My thanks go to my fellow seniors and friends Attimukat, Manoj, Nalin, Sohan Lal, Yogender, Jasbir, Rishi Pal, Mahender, Narender, Satish, Bhupinder, Pankaj and special thanks to Sitaram their unaccountable help and for providing an exciting and cooperative environment in the department.

Now, I am speechless! My words are not able enough to express my feelings. I have no words to express all the wisdom, love and support provided to me by my beloved Papa (Sh. Rakesh Bansal), Mummy (Smt. Urmil Bansal) and my younger brother Vaibhav Bansal for that I am bow-headed indebted. Their unconditional love and support in my each and every decision have inspired me to move forward in life. I deem myself the most fortunate person of the world for having them as parents.

The financial support from CSIR, New Delhi in the form of Junior and Senior Research Fellowships is greatly acknowledged.

(Anshul Bansal)
