CONTENTS

Chapter 0  Prelude  1

Chapter 1  Topologies from Weak Metrics

1.1 Introduction  12

1.2 Topology of Distance Space  14

1.3 Convergence of Sequences  28

1.4 Continuity  29

Chapter 2  d-Symmetric Spaces

2.1 Introduction  33

2.2 Implications among the axioms  35

2.3 Examples for nonimplications  40

2.4 Some Fixed Point Theorems in Symmetric Spaces  56

Chapter 3  Completion of a Dislocated Metric Space
3.1 Introduction 69

3.2 Completion 71

3.3 Completion of the metric associated with a d-metric 81

3.4 Fixed Point Theorems 85

Chapter 4 Dislocated Uniformities

4.1 Introduction 101

4.2 Pseudodislocated Uniformity 103

Chapter 5 Generalized Metric Spaces

5.1 Introduction 113

5.2 Some properties in Generalized Metric Spaces 114

5.3 Associated Pseudometric 124

5.4 Banach’s Contraction Principle 130
