ACKNOWLEDGEMENTS

Primarily, I express my deepest gratitude to the GOD ALMIGHTY for his abundant grace who blessed me to pursue this doctoral program in spite of so many hard situations. Though the following dissertation is an individual work, I could not be able to complete my dissertation without the help, guidance and support of a lot of people.

First and foremost, I offer my heartfelt gratitude to my advisor, Dr Saurabh Kulshrestha. I am greatly fascinated by his enthusiasm, his inspiration, and his great efforts to explain things clearly and simply. I have been fortunate to have an advisor who gave me continued help both professionally and personally and also the freedom to explore the things on my own. He is one of the best teachers that I have had in my life. I would like to give special thank also to my committee members Dr Kamal Dev and Dr Anuradha Sourirajan for their unconditional support.

I would like to thank the role model for hard workers in the University, Hon'ble Vice Chancellor, Prof. P. K. Khosla, for being the first person who taught me how to work positively and effectively in every situation of life. A special thank to him for his constant gracious support and for always keeping his door open. With God’s grace, I had several opportunities to work with remarkably experienced person like him in my life. He has played a very important role in shaping my life.

In my daily work, I have been blessed with a friendly and cheerful group of fellow students in my lab i.e. Ms. Chandrika Attri Seth, Ms Prachi, Ms Meenakshi, Ms Tanvi, Ms Kirti, Ms Chandresh, Mr Mohit, Mr Sunny and Mr Abhishek. They always helped me in setting up of my experiments and other lab requirements.

Special thanks to Dr Dinesh Kumar, Mr Ankur Kaushal and Deepak Kala for their help especially in the immunosensor development. I would also like to thank Ms. Shagun Gupta for bioinformatics analysis.

I convey my special thanks to Dr H. R. Pappu, Washington State University and Dr Bikash Mandal, Senior Scientist IARI for their guidance and encouragement in planning my experiments during the course of my studies.

I also thank Dr Sunil Puri, Dr S. C. Tewari, and Dr D.R. Sharma for their moral support throughout my work, I also express my gratitude to Dr Anil Handa and Dr Anjali Chauhan from Y.S Parmar University of Horticulture and Forestry Nauni for providing necessary help required at the time of research.
I would also like to express my gratitude to lab attendants Ms Anjana, Mr Baburam, Mr Rakesh and Mr Jai Singh for providing necessary facilities required by me during research.

I would also like to express my deepest appreciation to Mr Suresh, landscaping officer of University for accompanying me during the collection of experimental material and maintaining them.

Words cannot express heartfelt gratitude towards my dearest family members for bearing all the inconveniences in the due course of completion of this work. I am grateful to each and every one of my family and friends for their valuable prayers. Especially my wife, Neha who is certainly the main contributor of all the greatest in my life, including this thesis. I thank God for the extraordinary chance of having her as wife, friend, and companion.

Finally, I would like to thank great number of people have helped me directly or indirectly to complete my research work. It would be a long list to mention all the other friends I am indebted to. It is a pleasure to convey my gratitude to them all in my humble acknowledgement. I take this opportunity to record my sincere thanks to all the faculty members of my department and other departments of the University for their help and encouragement.

Needless to say, errors and omissions are mine.

(Anshul Sharma)
