“Praise be to Allah, Creator of the universe, The most gracious, The most merciful, Who gave me the courage and wisdom to carry out this work”

Mohiuddin Bhat, Director University Science Instrumentation Centre (USIC), the University of Kashmir, Srinagar, under whose diligent and enthusiastic guidance this work has been carried out. Words fail me to translate appropriately my gratitude and deep sense of inner feelings about the inspiration and help provided by my nears and dears especially my brothers Altaf Hussain and Gh. Jeelani, brother-in-law (gainer) Bashir Ahmad, sisters and sister-in-law. Also, I deeply acknowledge the innocent
ways of help that I would always receive from Numan and Afanda, my nephew
and niece, whose company would remove my mental agony and physical fatigue
and help me to return to my research ambitions.

Last but not the least, I shall feel myself incomplete if I not mention my
parents, for bearing my absence, and also my uncle who always wanted me to be
a great researcher (*Barister*).
