Acknowledgements

Writing a thesis is a job that takes several years to complete. In this period I have been enriched in numerous ways by interaction with many people. At this time of acknowledgement, I would like to thank everybody who has helped me along during these years, be it through advice, encouragement, comments, proofreading, or simply by being there.

My supervisor Professor M. A. Peer has been a great source of inspiration. It brings me immense pleasure to express my deep sense of indebtedness to him for his close supervision and persistent guidance all throughout the duration of this research work.

I would like to thank especially my co-supervisor Professor N. A. Shah for giving me an opportunity to join his group and for supervising this thesis. His interest and curiosity have in many ways stimulated and shaped my approach to the techniques of scientific research and publication. I feel really fortunate to have been able to work with him.

I was led into Cellular Automata by my friend Dr. A. R. Khan. I have shared many hours of discussion on Cellular Automata with him. I thank him for providing me the opportunity to work on Cellular Automata. My very special thanks and appreciation goes to my two dear students, Er. Syed Ishtiyaq Ahmad and Er. Zulfkar Ahmed for providing me valuable feedback and through their assistance in implementing the computer experiments.

During my stay at ISI Kolkatta, AMU Aligrah and IIT Delhi, I had the privilege to come in contact with the leading researchers of different fields. At this time of acknowledgement, I would like to offer my sincere thanks to Dr. Pabitra Pal Choudhury, of computer science unit, ISI Kolkatta, who very willingly agreed to be a test board for many of my initial ideas regarding CA and for providing me copies of several articles from journals which are not subscribed to our library.

I acknowledge the award of teacher fellowship under FIP scheme during 10th plan period by UGC, sanctioned vide their order No. F4-2(TF-7)/2003(NRCB), dated December 2003 for completion of this research programme.

My heart felt thanks are due to my parents, brothers and sisters. It is their blessing that enabled me to complete the task. Finally I must thank my wife Dr. Syed Tasmiah Mohi; it is only her patience and devotion that kept me in joy and in working mode all throughout this research work.

Khurshid Ahmad Khan
