ACKNOWLEDGEMENTS

It is with pleasure and gratitude that I acknowledge here the support rendered to me throughout my doctoral research work. My family members, well wishers, my students and colleagues have been there for me since my registration for doctoral work 3 and half years ago. They have helped me to successfully balance my career, research work and home and enjoy it too. First of all, my sincere thanks to my Guide Dr. Apoorva Palkar. You have always inspired me to expect the best from myself and given me the confidence to achieve what I aim for. The high aspirations you had of me and aims you set for me, have paved my path of excellence in research. I could not have wished for a better coach. My father Dr. S.W.Deshpande, has helped me with the conceptual design development and my mother Dr. Mrs. Asavari Deshpande has been my motivation. Dr. Deshpande, I greatly value my discussions with you which were primarily responsible in bringing a conceptual clarity of the research design. Your detailed comments and insight have been of great value to me. My parents have been my driving force throughout my research and have helped me and encouraged me in every possible way. Thank you is too small a word to express my gratitude towards them. My son Piyush, daughter Saniya and my brother Vibhas who have assisted me tirelessly in compiling the diagrams, the content and formatting, have saved me a lot of frustration and created time for me to focus on analysis of my data. Vibhas, in spite of having a very busy career of a scientist you have found time to help your sister in her research work. I really appreciate your help in formatting the entire thesis. My heartfelt thanks are due to my students Arshi, Ashutosh, Sanika, Snehal and Preeti for assisting me with the data collection and scoring. Your help has
certainly kept me sane by saving me from the rigmarole of vast data entry and compilation.

I am grateful to my dear friend Deepa, for helping me with the compilation of references, which would have been difficult and tedious otherwise. My thanks are also due to all those managers who have spared their valuable time in taking the various tests used in my data collection and also getting them administered to their subordinates. I have been blessed with friendly and cheerful colleagues. Shruti, Badri and Kavita, you have helped me in all times of difficulty and kept me mentally fit throughout my four years of research work. May it be simply data scoring or an unfinished thought, you were there for me always. I greatly value your support.
