1.7 COMPLICATIONS ASSOCIATED WITH WOUNDS
1.8 PRIORITIES IN WOUND MANAGEMENT
  1.8.1 Systemic stabilization
  1.8.2 Hemostasis
  1.8.3 Wound Assessment
  1.8.4 Wound healing
    1.8.4.1 Healing by primary intention
      1.8.4.1.1 Advantages of healing by primary intention
      1.8.4.1.2 Potential problems with primary intention
    1.8.4.2 Healing by secondary intention
      1.8.4.2.1 Disadvantages associated with secondary intention
    1.8.4.3 Delayed primary closure
    1.8.4.4 Wound healing by regeneration and or repair
      1.8.4.4.1 Specific Sites of wound healing
1.9 MECHANISM OF WOUND HEALING
  1.9.1 Hemostasis
  1.9.2 The inflammatory phase
  1.9.3 Cellular migration and proliferation
  1.9.4 Protein synthesis and wound contraction
  1.9.5 The Remodeling phase
1.10 FACTORS WHICH IMPAIR WOUND HEALING
  1.10.1 Infection
  1.10.2 Poor hygiene
  1.10.3 Local blood supply
  1.10.4 Oedema
  1.10.5 Wound hypoxia (Inhibited wound oxygenation)
  1.10.6 Smoking
  1.10.7 Cooling of the wound
  1.10.8 Insufficient diet or malnutrition
  1.10.9 Malnutrition delays healing
    1.10.9.1 Proteins
    1.10.9.2 Aminoacids
    1.10.9.3 Carbohydrates
    1.10.9.4 Fats
1.10.9.5 Vitamins
1.10.9.5.1 Vitamin C
1.10.9.5.2 Vitamin A
1.10.9.5.3 Vitamin E
1.10.9.5.4 Vitamin B
1.10.9.5.5 Vitamin K
1.10.9.6 Trace elements
1.10.9.6.1 Zinc
1.10.9.6.2 Iron
1.10.9.6.3 Copper and magnesium
1.10.10 Psychological Stress
1.10.11 Delayed inflammatory response
1.10.12 Age effects
1.10.13 Poorly managed or unrecognized diabetes mellitus
1.10.14 Drugs
1.10.14.1 Chemotherapeutic agents
1.10.14.2 Steroids
1.10.14.3 Nonsteroidal anti-inflammatory agents
1.10.15 Radiation
1.10.16 Risk Factors
1.11 MEDICATIONS FOR WOUNDS
1.12 SIDE EFFECTS
1.13 MANAGEMENT OF WOUND HEALING
1.14 NEED FOR STUDY

II REVIEW OF LITERATURE
2.1 MEDICAL SYSTEMS OF INDIA
2.2 AYURVEDIC CONCEPTS OF WOUND
2.3 AYURVEDIC REMEDIES FOR HEALING OF WOUNDS
2.4 WOUND HEALING ACTIVITY OF TOPICAL APPLICATION FORMS BASED ON AYURVEDA
2.5 HERBAL FORMULATIONS WITH WOUND HEALING ACTIVITY
2.6 ETHNOBOTANICAL APPROACHES TO WOUND HEALING DRUG DEVELOPMENT
2.7 ETHNOPHARMACOLOGICAL VALIDATION
2.8 PHYTOCONSTITUENT EXTRACTION
2.9 WOUND HEALING POTENTIALS OF PHYTOCONSTITUENTS
2.10 NATURAL PRODUCTS WITH WOUND HEALING ACTIVITIES

2.10.1 Natural products acting via modulating cellular activity

2.10.1.1 Modulators of the immune cell function

2.10.1.2 Vitamins

2.10.1.3 Alkaloids

2.10.1.4 Terpenoids

2.10.1.5 Polyphenols

2.10.1.6 Catechins

2.10.1.7 Sterols and polyphenols

2.10.2 Modulators of collagen synthesis

2.10.2.1 Vitamins and related compounds

2.10.2.2 Flavonoids

2.10.2.3 Tannins and other phenolic compounds

2.10.2.4 Terpenoids and Tri-terpenoids

2.10.3 Modulators of angiogenesis

2.10.4 Modulators of the extracellular matrix (ECM)

2.10.5 Modulators of cytokines and growth factors

2.10.5.1 Alkaloids

2.10.5.2 Flavonoids

2.10.5.3 Retinoids

2.10.5.4 Tannins

2.10.5.5 Terpenoids

2.10.6 Antioxidants as wound healer

2.10.7 Compounds act through multiple targets

2.11 ASTERACEAE FAMILY MEMBERS AS WOUND HEALING AGENTS

2.12 NUTRACEUTICALS AS WOUND HEALING AGENTS

III AIM & OBJECTIVES

3.1 OBJECTIVES

3.1.1 Specific objectives - I - To develop pharmacognostic standards

3.1.2 Specific objectives - II - To develop chemical standards

3.1.3 Specific objectives - III - To Evaluate Wound Healing Potentials of the Selected Plant extracts through in-vivo experiments
3.1.4 Specific objectives - IV - To evaluate efficacy of the selected drug in the supporting activities

3.1.5 Specific objectives - V - To understand the mechanism of action through \textit{in-silico} docking studies employing identified molecules

IV ETHNOBOTANICAL STUDIES

V MATERIALS AND METHODS

5.1 COLLECTION OF PLANT MATERIALS

5.2 BOTANICAL STUDIES

5.2.1 Organoleptic features

5.2.2 Macroscopic features

5.2.3 Microscopic features

5.2.3.1 Microtomy

5.2.3.2 Sectioning and staining

5.2.3.3 Photomicrography

5.3 HISTOCHEMICAL STUDIES

5.4 QUANTITATIVE MICROSCOPY

5.5 CHEMICAL STUDIES

5.5.1 Analytical methods

5.5.1.1 Preparation of powder and reagents

5.5.1.2 Determination of quantitative data

5.5.1.2.1 Physicochemical data

5.5.1.3 Test for inorganic constituents by (AA Spectrophotometer)

5.5.1.4 Quantitative analysis

5.5.1.4.1 Estimation of primary metabolites

5.5.1.4.2 Estimation of secondary metabolites

5.5.1.4.3 Estimation of vitamins

5.6 BEHAVIOUR OF DRUG POWDER WITH VARIOUS CHEMICAL REAGENTS

5.7 PHYTOCHEMICAL METHODS

5.7.1 Extraction of plant materials-cold extraction method

5.7.2 Preliminary photochemical screening

5.7.3 Fluorescence analysis

5.8 CHROMATOGRAPHIC PROFILING

5.8.1 High performance thin layer chromatography

5.8.2 LCMSMS analysis
5.9 PHARMACOLOGICAL STUDIES

5.9.1 Preparation of plant extracts

5.9.2 In-vivo studies

5.9.2.1 Wound healing models

5.9.2.1.1 Excision wound model

5.9.2.1.2 Incision wound model

5.9.2.1.3 Dead space wound model

5.9.3 Biochemical evaluation methods

5.9.4 Histopathological Studies

5.9.5 Analgesic activity

5.9.5.1 Tail immersion test

5.9.5.2 Acetic acid induced writhing test

5.9.6 Anti-inflammatory activity

5.9.6.1 Carrageenin induced hind paw oedema in rats (Acute inflammatory model)

5.9.6.2 Cotton pellet-induced granuloma formation in rats

5.10 ANTIMICROBIAL ACTIVITY

5.10.1 Antimicrobial activity for both aqueous and ethanol extracts

5.10.2 Antibacterial activity of extract ointment formulation

5.11 IN-SILICO STUDIES

5.12 STATISTICAL ANALYSIS

VI RESULTS

6.1 BOTANICAL STUDIES

6.1.1 Organoleptic features

6.1.2 Macroscopic features

6.1.3 Microscopic features

6.1.3.1 Anatomy of the leaf

6.1.3.2 Lamina

6.1.3.3 Leaf margin

6.1.3.4 Epidermal cells and stomata

6.1.3.5 Venation pattern

6.1.3.6 Petiole

6.1.3.7 Stem

6.1.4 Histochemical localisation studies

6.1.5 Quantitative microscopy
6.2 CHEMICAL STUDIES 145

6.2.1 Analytical Methods 145

6.2.1.1 Determination of quantitative data 145

6.2.1.1.1 Physicochemical constants 145

6.2.1.1.2 Determination of extractive values 145

6.2.1.1.3 Inorganic analysis 146

6.2.1.1.4 Test for heavy metals 146

6.2.1.2 Quantitative analysis 147

6.2.1.2.1 Estimation of primary metabolite 147

6.2.1.2.2 Estimation of secondary metabolites 147

6.2.1.2.3 Estimation of vitamins 148

6.2.2 Behaviour of drug powder with various chemical reagents 148

6.2.3 Preliminary phytochemical screening 149

6.2.4 Fluorescence analysis of drug powder 152

6.2.4.1 Fluorescence analysis of extract 153

6.3 CHROMATOGRAPHIC PROFILING 154

6.3.1 High performance thin layer chromatography 154

6.3.2 Liquid Chromatography - Mass Spectrometry (LCMS) 158

6.4 PHARMACOLOGICAL STUDIES 163

6.4.1 Excision wound model 163

6.4.1.1 Effect of ethanol and aqueous extract of *Centratherum punctatum* on rate of wound contraction in excision wound model 163

6.4.1.2 Effect of ethanol and aqueous extract of *Centratherum punctatum* on epithelialisation 167

6.4.1.3 Effect of ethanol and aqueous extract of *Centratherum punctatum* on wound surface microbial load count 167

6.4.1.4 Effect of ethanol and aqueous extract of *C. punctatum* on hydroxyproline and hexosamine of granuloma tissue 168

6.4.1.5 Effect of ethanol and aqueous extract of *C. punctatum* on protein and antioxidant status on excision wound 169

6.4.1.6 Effect of ointment of ethanol and aqueous extract of *Centratherum punctatum* on histopathological studies of granuloma tissue 172
6.4.2 Incision wound model

6.4.2.1 Effect of ethanol and aqueous extract of *Centratherum punctatum* on breaking strength

6.4.2.2 Effect of ethanol and aqueous extract of *C. punctatum* on hydroxyproline and hexosamine of granuloma tissue

6.4.2.3 Effect of ethanol and aqueous extract of *C. punctatum* on protein and antioxidant status on incision wound

6.4.2.4 Effect of ethanol and aqueous extract of *Centratherum punctatum* on histopathological studies of granuloma tissue

6.4.3 Dead space wound model

6.4.3.1 Effect of ethanol extract and aqueous extract of *C. punctatum* on dead space wound model

6.4.3.2 Effect of ethanol and aqueous extract of *C. punctatum* on hydroxyproline and hexosamine levels of granuloma tissue

6.4.3.3 Effect of ethanol and aqueous extract of *C. punctatum* on protein and antioxidant status on dead space wound

6.4.3.4 Effect of ointment of ethanol and aqueous extract of *Centratherum punctatum* on histopathological studies of granuloma tissue

6.4 ANALGESIC ACTIVITY

6.4.1 Tail immersion method for acute pain

6.4.2 Writhing method for chronic pain

6.5 ANTI-INFLAMMATORY ACTIVITY

6.5.1 Acute inflammation induced by carrageenin induced hind paw edema in rats

6.5.2 Chronic inflammation induced by cotton pellet-induced granuloma formation in rats

6.6 ANTIMICROBIAL ACTIVITY

6.6.1 Antimicrobial activity of ethanol extract of *C.punctatum*

6.6.2 Antimicrobial activity of water extract of *C.punctatum*

6.6.3 Antimicrobial activity of CP1 ointment (Ethanol extract based)

6.6.4 Antimicrobial activity of CP2 ointment (Aqueous extract based)

6.7 *IN-SILICO* STUDIES
VII DISCUSSION

7.1 BOTANICAL STUDIES

7.1.1 Organoleptic studies
7.1.2 Macroscopic features
7.1.3 Microscopic features
7.1.4 Histochemistry
7.1.5 Quantitative microscopy

7.2 CHEMICAL STUDIES

7.2.1 Determination of quantitative data
7.2.1.1 Physicochemical data
7.2.1.2 Determination of extractive values
7.2.1.3 Inorganic analysis
7.2.1.4 Quantitative analysis
7.2.1.5 Phytochemical methods
7.2.1.6 Fluorescence analysis

7.3 HPTLC PROFILES

7.4 LIQUID CHROMATOGRAPHY - MASS SPECTROMETRY (LC-MS)

7.5 EXCISION WOUND

7.5.1 Wound contraction
7.5.2 Period of epithelialization
7.5.3 Microbial load count

7.6 INCISION WOUND

7.7 DEAD SPACE WOUND

7.8 STUDIES ON SUPPORTING ACTIVITIES OF WOUND HEALING PROCESS

7.8.1 Analgesic activity
7.8.1.1 Tail immersion test models
7.8.1.2 Acetic acid induced writhing test models
7.8.2 Anti-inflammatory activity
7.8.2.1 Carrageenin induced paw edema method
7.8.2.2 Cotton-pellet induced granuloma method

7.9 ANTIMICROBIAL ACTIVITY

7.9.1 Antimicrobial activity of both aqueous and ethanol extracts of Centratherum punctatum

7.10 IN-SILICO STUDIES
VIII SUMMARY AND CONCLUSION 244
8.1 BOTANICAL STUDIES 244
8.2 CHEMICAL STUDIES 245
8.3 WOUND HEALING STUDIES 246
8.4 SUPPORTING ACTIVITY STUDIES 246
  8.4.1 Analgesic activity 246
  8.4.2 Anti-inflammatory activity 246
8.5 ANTIMICROBIAL ACTIVITY 246
