ACKNOWLEDGEMENT

It is just my name on the front page and whilst this physical document represents a personal journey, this work would not have been possible without a whole raft of people. This thesis has been kept on track and has been seen through to completion with the support and encouragement of numerous people including my parents, my in-laws, my husband, well wishers, my friends, colleagues and various institutions.

At this moment of accomplishment, first of all I am humble to offer my sincere thanks to the Almighty who walked with me throughout my endeavour, gave me courage to overcome the hurdles for the successful completion of my thesis.

The difference between a guide and a true guide is that a guide says “Go” while a true guide says “Lets go”. I would like to express my sincere gratitude to my erudite supervisor and guide Dr.C.Sasikumar Ph.D., Associate Professor and Head, PG and Research Department of Biotechnology, Nehru Memorial College (Autonomous), Puthanampatti, Tiruchirappalli for the continuous support of my Ph.D study and research, for it would have been an impossibility without his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me at all the time of research and writing of this thesis. His deep insights helped me to complete my work in the allocated span of time.

I owe my profound thankfulness to Shri.M.Ponnambalam, Chairman, Shri.Pon.Balasubramaniam, President & Shri.Pon.Ravichandran, Secretary, Nehru Memorial College (Autonomous), Puthanampatti, Tiruchirappalli - 621 007 for providing all possible infrastructural facilities to carry out my research work.

I wish to express my warm and sincere thanks to Dr.T.Jayaprakasam, Principal and Dr.K.Ramasami, Former Principal, Nehru Memorial College (Autonomous), Puthanampatti, Tiruchirappalli-621 007 for their support and encouragement throughout the course of my study.

I am deeply grateful to my doctoral committee members Dr. J.John, Associate Professor, Department of Plant Biology and Plant Biotechnology, St.Joseph’s College (Autonomous), Tiruchirappalli and Dr. M. Jayanthi, Associate Professor and Head, Department of Biotechnology, S.R. College (Autonomous),
Tiruchirappalli for their constructive comments, suggestions, and support throughout this work.

It is a moment of great pleasure for me to express my deep sense of gratitude and indebtedness to Professor Dr.P.Brindha, M.Sc., Ph.D., E.I.M.P., Dean, CARISM, SASTRA University, Thanjavur. Her practical suggestions, creative criticisms, patience, dedication have been an enriching and unique experience, which I shall cherish for a long time to come.

I would like to account my special regard and thanks to Dr.A.Panneeselvam, Associate Professor of Botany and Microbiology, A.V.V.M.Sri Pushpam College, Poondi, Thanjavur for his timely help and guidance throughout the tenure of my work.

My sincere and heartfelt thanks to Prof.Dr.P.Jayaraman Ph.D, Director, Institute of Herbal Botany, Plant Anatomy Research Centre, Chennai for helping me identify my plant of interest and providing me with all necessary infrastructure to conduct my research in his lab.

I want to express my warmest gratitude to Ms. J. Radhika, M.Sc., Ph.D Principal and Ms. G. Jothi, Ph.D., Head, Department of Biochemistry, Srimad Andavan Arts and Science College, Tiruchirappalli. I also owe a huge debt of gratitude for their kind support and guidance which have been of great value in this study.

My sincere thanks to my colleagues Dr. M. Meenakshi Sundaram, Mr. S. Miller Samson & Lab assistant Mr. M. Saravanan for their friendly enthusiastic support, timely help and encouragement.

It gives me immense pleasure to thank Dr. P. Neelanarayanan, Associate Professor & Founder-Director, Centre for Eco-friendly Agro-Technologies (CEAT) and Research Supervisor, Research Department of Zoology, Nehru Memorial College (Autonomous), Puthanampatti for his valuable suggestions, encouragement and timely help during the course of my study.

My sincere thanks to Mr. K. Sathis kumar, Mr. D. Selvamuthukumaran, Mr. M. Murali, Mrs. J. Viji, Research Scholars of the Department of Zoology and Mr. N. Subash, Project Fellow, UGC’s Major Research Project, Department of Botany and
Biotechnology who rendered their valuable help in various ways during my research work.

Rarely does someone get to influence a person's life in a positive way for a lifetime, fostering optimism and confidence, providing knowledge that leads to success, and being a good role model. I place on record my deep sense of gratitude to Mr. N. Agnel Arul John Ph.D, Mr.G.Sridharan Ph.D, Mr.R.Sivasubramanian, Mr.R.Parthasarathy Ph.D and Mr.K.Ramesh, Department of Biochemistry, Srimad Andavan Arts and Science College.

Greatfulness is the key to a happy life and at this juncture it is my earnest duty to thank my husband Mr.M.Vaidyanathan without whom I could not have completed this work. Not only did he offer unstinting love, support and encouragement, but he has proved himself to be a man who is proud to have a wife who has a few more degrees on the wall than he does.

My heartfelt thanks to my parents, Mrs.S.Nagalakshmi and Mr.V.Venkataramani who watched me from a distance while I worked towards my degree constantly providing support, prayers and inspiration at all hours of this work. The completion of this thesis will mean a lot to them, particularly “seeing more of me”.

My special acknowledgement goes to my inlaws Mrs.S.P.Suseela Devi and Mr.S.S.Muthukumaran who made this difficult task achievable by extending their warm hands at the most needy hours.

My special thanks to my beloved sister and brother in law Mrs.V.Gayathri and Girish Subramanian for their unprecedented support and endurance during my tenure of work. I also owe my special thanks to my sister in laws and brother in laws Mrs & Mr. Murali and Mrs & Mr. Vaithianathan for their support and encouragement during my tenure of work.

It’s my fortune to gratefully acknowledge the support of some special individuals at this journey of PhD research which has had its highs and lows; yet, I am most lucky to have enormous support along the way through my best friends Mrs.J.Kavitha Sri Lakshmi and Mr.S.Sriram who have traveled with me right from the early days of my research tenure and have kept me going on till this moment.
Words are short to express my depth of gratitude towards Mrs & Mr. A. Sridharan who offered their home for my stay during my entire course of study and extended parental care with their constant prayers and encouragement which were motivating factors both at my bright and dark times. My sincere and heartfelt thanks to Mrs & Mr. M. Janakiraman for their constant support, prayers for my successful completion and words of encouragement that pulled my spirits high at my dark times.

I extend my sincere thanks and appreciation to Mr.R.Venkatesh for joining hands with my husband in this travel and extending his brotherly- fun filled affection and encouraging words which stimulated me to progress faster in my work.

I would fail in my duty if I do not render my sincere thanks to Late Mr.Thiraviyadas, Botanist, Bharathidasan University who played a very important role in helping me collect my plant of interest at the best time which played the base role in starting my research work.

This thesis would have not seen a successful completion without the untiring efforts of Mr.N.Ramesh and his colleagues in New Sunway Cyber Cafe who devoted their time for compilation of the same.

Last but not the least, I render my sincere thanks to my maternal uncle Late Mr.S.Satyanarayanan who was instrumental behind this whole plan of resuming a PhD degree. I can never forget his hard times and last hours. His unflinching courage and conviction will always inspire me in my lifetime. I wish his soul roots in peace and solace in the heaven. I can only say a proper thanks to him by dedicating my thesis to him.

Working on a PhD is supposed to be an endeavour completed in seclusion, but in practice one cannot survive without the help and support from others. I at this juncture admit that it would have been a herculean task to achieve this goal without the support of all my well wishers. We can always find something to be thankful for, and here is a big one for which I still feel words were too insufficient to express the complete indebtedness I owe for each individual I have mentioned in here and also to whom I have failed to mention by error.

V. MEENAA
