Acknowledgement

This work was carried out at the Department of Biotechnology, Plant Improvement Division, Tea Research Institute, Tocklai Experimental Station, Jorhat, Assam. I am grateful to the Director, Dr. M. Hazarika for providing me with the opportunity to work in this premier institute.

I thank Dr. S. C. Das, Head, Plant Improvement Division, TRA, for his valuable guidance throughout the course of investigation and also for critical reviewing of the manuscript.

I am also thankful to Dr. P. J. Handique, Reader, Department of Biotechnology, Gauhati University, for his many valuable comments and advice throughout the work and for critical reviewing of the manuscript.

I am grateful to Dr. P. K. Bordoloi, In Charge, Biotechnology Department, TRA, for his advice and the scientific discussions about the work and for reviewing the manuscript.

I thank Dr. P. K. Bordoloi, In Charge, Statistics Department, for his help in the statistical analysis and interpretation of the data.

I am grateful to all the scientists, scientific assistants especially, Mr. R. K. Dutta, H. Saikia, and Mr. R. K. Bordoloi and supporting staff of the Plant Improvement Division, TRA for their various help and assistance throughout the work.

Special thanks are due to all my present and past colleagues for a pleasant teamwork.

My thanks are also to my parents and my family members for their support beyond the academic scene.

Financial support from DBT, Govt. of India in the form of research fellowship is gratefully acknowledged.

Sangeeta Borchetia
