ACKNOWLEDGEMENTS

I thank Dr. P. Pramod, my Ph.D. supervisor for this dissertation, for all the advice and encouragement he gave me during the course of this study. Without his contribution this thesis would have been impossible to complete. He was always there for me whenever I asked for the comments. I salute his indomitable working spirit which I would like to adapt in my personal life.

My passionate encounters with the Hanuman langurs in peninsular India should undoubtedly be accredited to Dr. K. Praveen Karanth, Assistant professor, CES, IISc whose ideas, I have tried and extended in this dissertation work. He has been very accommodative and generous with his ideas, time, and support and funding. It’s been a great experience working with a thorough professional like him. The present study was carried out as a part of the project funded to Dr. K. Praveen Karanth, Assistant professor, CES, IISc, Bangalore-560012 by the Department of Biotechnology, Government of India (BT/PR-7127/BCE/08/445/2006) and Ministry of Environment and Forest, Government of India.

I have benefitted a lot from the formal and informal, academic and nonacademic discussions I had with Mr. M. S. Chaitra for whom I have a great respect both for his principles and ethics in life. He has always been around me for articulating my learning process.

I am greatly indebted to the Director of Salim Ali Centre for Ornithology and Natural History and Chairman of Center for ecological sciences, Indian Institute of science for all the facilities provided to me.

I thank the forest departments of Maharashtra, Goa, Karnataka, Kerala, Tamil Nadu, and Andhra Pradesh Forest for permissions and cooperation. In particular I want to thank all the authorities of selected Zoological parks of respective forest departments in all of these states for permission to carry out my observations on Hanuman langurs. I also want to thank
Dr. Shivarama Karanth biological park, Pilikula, Mangalore for their help and assistance and Mr. Sudhindra Aithal for allowing me to carry out my observations at his mini zoo at Saaligrama, Kundapur.

Various organizations like Bombay Natural History Society, Centre for infrastructure, Sustainable Transportation and Urban Planning (CiSTUP), Asian nature conservation foundation, FSL-India, India nature watch, Agumbe rainforest research station, National Institute of Advanced Studies in their various capacities helped me easing my academic study. Indian Institute of Science deserves a special mention for a thorough academic environment it has provided to beginners like me. I want to thank non-teaching staff of CES and SACON for all their cooperation. Many thanks to the library at CES, IISC as well. I specially thank Prof. Rohini Balakrishnan, Prof. R. Sukumar, and Dr. T.V. Ramachandra and his lab members at CES, IISC, Bangalore and their staff for accommodation and logistical support.

I owe a lot to Sudheera, Gururaja, K.V. and Avinash K who patiently sat through in drawing the maps for me inspite of their busy schedules.

I sincerely acknowledge individuals like Dr. Ravi Chellam, K.V. Gururaja, P. O. Nameer, V. V. Sivan, Anoop Das, Shirish Manchi, Manjunath Reddy, Rishi Kumar, Santosh Shanbhag, Kushal Kamble, L. M. Bhat, H. N. Kumara, Ullasa Kodandaramiah, Sheshagiri Rao, Harish Bhat, Manjunath Shetty, Soumya Prasad, Ameen Ahmed, Sanjay Molur, H. S. Ananth, Anantha Krishna Sharma, Laurens Verwijs, Martin Zaruba, Hanka Svobodova, Srinivas Udupa, Atul Joshi, Jayant Mahale, Rishikesh Desai, Rajashekar Hippargi, Nitin Sawanth, Henrik Krehenwinkel, Vishnupriya Kolipakkam, Ishan Agarwal, Dr. Manjunath, Achyuthan, Karthick, Sameer Ali, Suresh, Hari, Krishnamani, Eswaran, Tejaswi K Bhat, Kiran P Shenoy, S. R. Anantha Narayana, Sindhu Radhakishna, Ponnanna, Sameera’s family (Tanuku), Anoop Das, driver Kumar, research scholars at SACON and many friends from wildlife circle for their valuable support during my field surveys. I wish to acknowledge members of Dr. Karanth’s lab and especially Ms. Rohini Bansal for all the support and tolerance during my memorable stay at CES.
I have to admit that I have learnt a great deal of subject from the discussions with Gopal Unni Krishnan Kurup, Anindya Sinha, Ajith Kumar, Mewa Singh, Niranjan V. Joshi, Praveen Karanth, S. P. Vijayakumar, K. A. Subramanian, Divya Mudappa, T.R. Shankar Raman, Colin P. Groves, Douglas Brandon Jones, Karthik Shanker, Kavita Iswaran, late Dr. Ravisankaran, Vijay Kumar Krishnamurthy, G.V. Pavan Kumar. I candidly admit that my knowledge of Hanuman langurs strengthened to a greater extent the credit, which I owe to Sarah Blaffer Hrdy's inspiring book “The Langurs of Abu” published in 1977.

I am greatly indebted to Dr. N.S. Leela professor of Zoology, M.E.S. College, Bangalore for constantly prodding me to build a scientific temper; Dr. Anindya Sinha (rana da) and Dr. Anantha Krishna Sharma for introducing me to world of primatology. I also wish to express my gratitude to late Dr. Upendra Shenoy who made a great impact on my learning process.

I wish to express my profound gratitude to Kusuma R. Goli, Rajendra Pai, Nirmala Mahale, Mamata Shanbhag, Sugandha Shenoy, Pradeep Pai, Sridhar Gadiyar, Shobha Varadaraj and their family members for help, hospitality and support during my field work. I would like to commit to memory Aravinda Shenoy and Anupama Shenoy for all their support. Special thanks to Dr. Jagadish Pai, Dr. Nanda Pai and Dr. P. Raghuram Shenoy who helped me to recover quickly from a brief accident at Kudremukha National Park. I wish to acknowledge my deep gratitude to my in-laws Mr. Vijayendra Shenoy, P and Mrs. Jamuna V Shenoy who have not only helped in some of the data extraction but have also been a source of constant intellectual and moral support. Special thanks to my grandfather Late Raghavendra Achar, uncles Krishnamurthy P. R and Late K. Muralidhar for having a profound influence in my life. I wish to thank my parents, sister’s family, close relatives and friends for all their support in my endeavor. I wholeheartedly wish to acknowledge the support given by my wife Padavu Anjana Shenoy without whom this thesis wouldn’t have taken shape this early. Lastly I reserve my acknowledgements to the taxon of focus Semnopithecus entellus or more commonly Hanuman langur, the Hindu monkey-god for being an appropriate model system and stimulating me again and again to be always at its proximity to understand the various facets of its biology.
