ACKNOWLEDGEMENTS

In the name of Allah, Most Gracious, Most Merciful. My first and foremost thanks’ giving is for the almighty, the owner and the creator of the whole universe, without whose help and guidance, nothing comes into existence and who bestowed upon me the courage, patience and strength to embark upon the work and carry it to its completion.

My special and heartiest thank is to my loving parents whose kindest blessings had stood me in finest of steed in my thick and thin. I am also thankful to my brothers, sisters and friends without their moral and social support I would not have been able to complete my research.

I am highly obliged to the scholastic and highly sophisticated research guidance of my supervisor Dr. Asma Parveen whose incisive knowledge and varied experience on the subject had made my imposing task even easier. Her motherly concern and friendly advice had remained with me as my guiding star in my pursuit of research.

I would also express my gratitude to Prof. Abu Sufyian Zilli, Chairman, Department of Psychology, Prof. Mahmood S Khan, Prof. Hamida Ahmed and all the distinguished teachers of the department of Psychology.

Last but not least I would like to utter my appreciation to all non-teaching staff of the department of psychology.

(Iram Feroz)
