Acknowledgement

In the name of Allah, the Most Beneficent, the Most Merciful

All praise is due to Allah; and peace and blessings be upon His messenger and servant, Muhammad, and upon his family and companions and whoever follows his guidance until the Day of Resurrection.

It gives me immense pleasure to express my sincere regards and profound gratitude to my supervisor Prof. Asif Ali for his invaluable guidance, keen interest, enlightening criticism and constant encouragement throughout the course of my research work. The intensive training that I have imbibed during my PhD would be substantially beneficial for my academic carrier. Apart from his guidance, he has given me the confidence and lifted my spirits, which cannot be described in words. It was his great help that I got the chance to initiate and complete this thesis.

My Deep gratitude goes to Prof. Shahid Ali Siddiqui, my co-supervisor, for his continuous support, constructive criticisms and permission to collect sera of the cancer patients during the clinical studies of my research work. This work would not have been successfully completed without his kindness and precious help.

I take this opportunity to convey my profound gratitude and heartfelt regards to Prof. Khursheed Alam, the chairman of the Department of Biochemistry, for providing essential infrastructure and resources to carry out my research work.
I am grateful to Dr. Moinuddin for his esteemed guidance, practicality and enlightening criticism. I really learnt a lot from him especially during the research paper work. His support during my research work is undoubtedly unforgettable.

I am also thankful to other teachers of the department especially Prof. Najmul Islam who always supported me during the adverse situations of my life.

I would like to express my deep gratitude to Prof. Riaz Mahmood for his guidance and precious advice. His constructive comments and suggestions throughout my research paper work and thesis work were outstanding. I am also thankful to Prof. Bilqees Bano who motivated and guided me to this great institution. I would also like to thank Dr. Rizwan Hasan Khan and Prof. Shabbir Ahmad for providing instrumental facilities for the present research work.

It is my proud privilege to thank Dr. Kiran Dixit for her valuable guidance, keen interest and ceaseless encouragement throughout my research work. Her knowledge about science and research is undisputable and outstanding.

The encouragement and support of Dr. Zarina Arif is thankfully acknowledged.

It gives me immense pleasure to express my sincere thanks to my seniors especially Dr. Asad Khan, Dr. Saheem Ahmad, Dr. Shafeeqe Ahmad, Dr. Mohammad Aijaz, Dr. Jalaluddin Muhammad Ashraf, Dr. Farzana Khatoon, Dr. Saman Ahmad, Dr. Uzma Shahab, Dr. Binish Arif, Dr. Shazia Aman, Dr. Gulam Rabbani, Dr. Mohammad Azam Ansari, Dr. Zubair Ahmad, Dr. Azam Ansari, Ms. Saba
Ahmad, and to my friends Mr. Sheikh Manzoor and Mr. Mohammad Jane Alam, and all other friends, especially of Hadi Hasan Hall and Biotechnology Unit, for their help and support. Their presence and encouragement in this research is unforgettable.

I deem it a privilege to express my thankfulness to my colleagues Mr. Abdul Rouf Mir, Mr. Mir Yasir Arfat, Mr. Wasil Hasan, Dr. Sana Alam and Dr. Akif Ahsan,. We experienced together all the ups and downs of routine work, shared happiness of success and the depression of failure when (sometimes) everything went wrong. They showed the actual meaning of friends and friendship.

I owe a deep sense of gratitude to my lab mates and of course friends Mr. Badarul Islam and Dr. Shaziya Allarakha, for their constant moral support and encouragement. They always motivated me. Their help and co-operation, especially during my thesis writing phase, is unspeakable.

I am highly thankful to my dear friend-cum-brother Mr. Yasir Bashir of Tezpur University, Assam, who always helped me a lot not only in my research work but also in my personal life and taught me how to overcome problems. It is my good luck to be his friend and to receive his support and knowledge as a gift of almighty Allāh.

I am also thankful to my juniors Dr. Jyoti, Sidra, Irfan, Adnan, Asif, Naureen, Faiza, Sarah, Nilofer, Dr. Arif and Dr. Shamim who always lent a helping hand whenever I needed help. Their kind support and co-operation made my research easy.

I significantly value the help and co-operation extended by non-teaching and technical staff especially Nasir bhai, Faisal bhai,
Gautum bhai, Huma aapa, Afzal Bhai, Mujahid bhai, Shahabuddin bhai, and the staff members of the clinical laboratory during the course of my research work.

Cleanliness is considered as one of the most important necessities of a research work which is almost impossible without the help of the cleaners. Therefore, I show my thanks to Hari Bhai and Raju Bhai for enabling my lab works to be contamination free.

I don’t know how to express my gratitude to my beloved parents as I invariably fall short of words to express my heartfelt gratitude and profound thanks to them. With all the sincerity, I convey my gratitude towards them, their exquisite benedictions, unflinching support, good wishes, love and affection that they bestowed upon me right from the day of my advent to this earthly world, became my strength that inspired me to achieve the pinnacle of success in the academic world and above all fulfilled my every wish. I always pray for them with the Qur’anic words, “My Lord, have mercy upon them as they brought me up [when I was] small.” Aameen! (Al-Qur’an, Chapter: 17, Verse: 24)

My special thanks go to my lovely sisters Aapa, Baji and Shanno Baji; to my loving brothers Bhai and Javed Bhai and all other relatives for their prayers and moral support. They always supported me and encouraged me with their best wishes. Their steadfast faith and confidence in my abilities always motivated me.

I got tears in my eyes when I started thanking my guide, motivator, supporter and what not...The man who changed my life, who showed me the path of success, who made me able to go for
the research. He is none other than my beloved brother Late Dr. Khursheed Ahmad. Although he left this world earlier, but he has left his mark on hearts and minds. A noble soul, a beautiful character, that matchless smile, and the zeal to conquer hearts through rekindling the bulbs of vision, my brother was an embodiment of affection, sincerity and excellence. I owe my brother every celebration of success. The success he achieved proves that a middle class person can also go to the peak of a success by hard work and firm determination. I pray to Almighty Allah, “My Lord, I beg you to pardon the sins of my brother and grant him JANNATUL FIRDOUS.” Aameen!

Before concluding, how can I forget to mention the names of my sweet, lovely, joyful and caring nieces and nephews Shadab, Baby, Shiba, Zeba, Sahil, Shazeb, Faraz and most dashing Sa’ad. Their presence in my life is as if I am roaming in the garden of beautiful flowers. Whenever I was stressed, they made me relax by their stupid and funny activities.

FINALLY, ALL SUCCESS IS FROM ALLAH
AND ALL PRAISE IS DUE TO HIM.

Date:                         (Parvez Ahmad)
