## List of Tables

1.1 Results of DCSFPSS to Determine EPI and PPI for Fabric Weave Pattern ......................................................... 17
1.2 Results Summary of MA, CA, HA, modified DCSFPSSMA and TA Approaches for GFDD ........................................... 17
1.3 Summary of GFDIC Results using DCSFPSS-LMBP on Plain and Twill Defects ......................................................... 18
1.4 Comparison of DCSFPSS-NN Results with Previously Reported Results ........................................................................... 19
2.1 Sources of Grey Fabric Defects and Their Types ....................... 30
2.2 Classification of FDD Schemes .................................................. 35
2.3 Summary of Literature Review on Bi-level Thresholding .......... 37
2.4 Summary of Literature Review on Gray Level statistics .......... 42
2.5 Summary of literature review on Morphological Approach(MA) .. 48
2.6 Summary of Literature Review on Co-occurrence Matrix ............ 56
2.7 Summary of Literature Review on Fourier Transform ............... 65
2.8 Summary of Literature Review on Correlation Approach .......... 70
2.9 Summary of Literature Review on Gabor Transform ................. 72
2.10 Summary of Literature Review on Wavelet Transform ............. 75
2.11 Summary of Literature Review on Fourier Power Spectrum(FPS) ... 84
2.12 Summary of Literature Review on FDD in Spatial Domain .......... 90
2.13 Summary of Literature Review on FDD in Frequency Domain ..... 91
List of Tables

3.1 Details of Plain Grey Fabric Samples under Study……………………………101
3.2 Details of Twill Grey Fabric Samples under Study ………………………102
3.3 Sequence of Morphological Operations followed for Images in Figure 3.11………………………………………………………………………………113
3.4 Trial Test Results of Morphological Operations on S2 Class Normal (N) and Loose-weft Defect (LW-F) for Different Test Set Parameters with Binary Image Opening with 60 Pixels…………………114
3.5 Sequence of Morphological Operations Followed for Images of Figure 3.13……………………………………………………………………………118
3.6 Fabric Types/ Defect Types for CA…………………………………………122
3.7 Result Details of CA Applied on Plain Weave Defects……………………124
3.8 Result Details of CA Applied on Twill Weave Defects…………………..126
3.9 Details of MA,CA and HA Applied on Plain and Twill Weave Defect……………………………………………………………………………………………..130
4.1 Results of Fourier Spectrum and FPS on Horizontal and Vertical Stripe Pattern………………………………………………………………………………148
4.2 Result Details of Fourier Spectrum and FPS Applied on Simulated Diagonal pattern………………………………………………………………………..149
4.3 Result Details of Fourier Spectrum and FPS Applied on Simulated Checks Pattern………………………………………………………………………..152
4.4 Result Details of Fourier Spectrum and FPS Applied on Plain and Twill Real and Simulated Pattern…………………………………………………159
4.5 Application Results of DCSFPSS on Real Plain Weave Pattern Samples………………………………………………………………………………………….163
4.6 Application Results of DCSFPSS on Real Twill Weave Pattern Samples………………………………………………………………………………………….163
4.7 Application Results of DCSFPSS to Determine EPI and PPI of Fabric Samples of Different Fabric Class ………………………………………….165
4.8 Location of Peaks in u and v Direction of DCSFPSS and
