Figure 6. 5 To increase market share/turn over ......................... 133
Figure 6. 6 To improve export potential ..................................... 134
Figure 6. 7 To improve quality of products ................................. 134
Figure 6. 8 To improve working system .................................... 135
Figure 6. 9 To reduce rejection rate ........................................... 135
Figure 6. 10 To increase productivity of labour/machines ............. 136
Figure 6. 11 To reduce customer complaints .............................. 136
Figure 6. 12 To qualify as a supplier for companies demanding ISO certification ......................................................... 137
Figure 6. 13 To improve customer satisfaction ............................ 137
Figure 6. 14 To experience continuous improvement in the work processes ................................................................. 138
Figure 6. 15 To reduce cost of production ................................... 138
Figure 6. 16 To boost up morale of employees ............................ 139
Figure 6. 17 To improve co-operation and co-ordination ............. 139
Figure 6. 18 Extent to which objectives are achieved .................. 141
Figure 6. 19 To what extent has the documentation burden increased due to ISO? ................................................................. 142
Figure 6. 20 To what extent the cost incurred in ISO 9000 is justified? ........................................................ 143
Figure 6. 21 Do you focus on continues improvement? ................ 143
Figure 6. 22 Is your maintenance system designed to reduce down time? ................................................................. 144
Figure 6. 23 Performance evaluation of processes ....................... 144
Figure 6. 24 Do you consider ‘customer complaints’ as a part of non-conformity? ................................................................. 144
Figure 6. 25 Trace-ability record keeping ..................................... 145
Figure 6. 26 Calibration of measuring instruments ....................... 145
Figure 6. 27 Sampling, 100% inspection or both? ....................... 146
Figure 6. 28 Future plan towards TQM implementation ............... 146
Figure 6. 29 Increase in market share/turn over ......................... 147
Figure 6. 30 Improvement in export orders .................................. 148
Figure 6. 31 Improvement in quality of products ......................... 148
Figure 6. 32 Improvement in working system ............................. 149
Figure 6. 33 Reduction in rejection rate ..................................... 149
Figure 6. 34 Increase in the productivity of labour/machines ......... 150
Figure 6. 35 Increase in the no. of orders where customers consider certification ................................................................. 150
Figure 6. 36 Improvement in customer satisfaction ..................... 151
Figure 6. 37 Continuous improvement in the work processes ....... 151
Figure 6. 38 Reduction in cost of production .............................. 152
Figure 6. 39 Improvement in the morale of employees ................. 152
Figure 6. 40 Improvement in coordination and cooperation .......... 153
Figure 6. 41 Increase on time delivery ...................................... 153
Figure 6. 42 Year of implementation of TQM ............................. 155
Figure 6. 43 Types of Company .................................................. 156
Figure 6. 44 Scale of Operations ................................................ 156
Figure 6. 45 Number of Employees
Figure 6. 46 Type of Industry
Figure 6. 47 Responses on Quality Chain
Figure 6. 48 Responses on Process Management
Figure 6. 49 Responses on Continuous Improvement
Figure 6. 50 Responses on Employee Empowerment
Figure 6. 51 Responses on Team working and Synergy
Figure 6. 52 Responses on Creativity and Innovation
Figure 6. 53 Responses on Benchmarking
Figure 6. 54 Responses on Housekeeping
Figure 6. 55 Responses on Kaizen
Figure 6. 56 Improvement in Customer Satisfaction
Figure 6. 57 Decrease in Failures in products/service defects, errors or failures
Figure 6. 58 Decrease in number of Customer Complaints
Figure 6. 59 Improvement in financial results
Figure 6. 60 Company has developed a culture that emphasizes quality
Figure 6. 61 Increase in number of employees participating on quality teams
Figure 6. 62 Increase in Employee Satisfaction
Figure 6. 63 Decrease in Employee Turnover
Figure 6. 64 Improvement in quality of incoming materials by partnership with suppliers
Figure 6. 65 Lack of understanding
Figure 6. 66 Resistance to change
Figure 6. 67 Lack of Resources
Figure 6. 68 Lack of system and structures for TQM activities
Figure 6. 69 Non availability of training
Figure 6. 70 Training with no purpose
Figure 6. 71 Costly consultancies, training programmes
Figure 6. 72 Lack of rewards and recognition
Figure 6. 73 Lack of effective measurement criteria
Figure 6. 74 Lack of evaluation procedures and benchmark indices
Figure 6. 75 Quality circles in organization
Figure 6. 76 Number of Quality Circles
Figure 6. 77 Awareness of 5S standard related to housekeeping
Figure 6. 78 Systematic implementation of 5S standard
Figure 6. 79 Success achieved by implementation of 5S
Figure 6. 80 Type of company
Figure 6. 81 Scale of cooperation
Figure 6. 82 No. of Employees
Figure 6. 83 Type of industry:
Figure 6. 84 Locality of the company
Figure 6. 85 Quality plan in organization
Figure 6. 86 Inspection carried out on finished goods, stage wise or both
Figure 6. 87 Materials for which inspection is carried out
Figure 6. 88 Awareness of ISO/TQM
Figure 6. 89 Loss in order because company is not ISO certified
Figure 6. 90 Increase in volume of business due to ISO Certification
Figure 6. 91 Do you think ISO certification is about increasing documentation burden?
Figure 6. 92 Systematic procedure for handling orders and enquiries
