ACKNOWLEDGEMENT

The present work was taken up at the suggestion of Prof. D.S. Srivastava, M.Sc., Ph.D. (Belfast), F.R.E.S., F.R.E.S., F.Z.S. (Lond.), F.Z.S.I., F.R.A.S., Professor of Zoology & Dean, Faculty of Science, University of Saugar, Saugar, M.P. (India), under whose supervision it has been carried out. I wish to express my sense of deep gratitude to him for constant encouragement and interest in the work and helpful suggestions and criticisms from time to time.

The author takes this opportunity to thank Mr. K.H. Alikunhi, Research Officer, Inland Fisheries Sub-station, Cuttack, for according all facilities for the collection of material from the sub-station.

The author also wishes to express his deep gratitude to the authorities of the Education Department, Government of Rajasthan, for granting study leave for 21 months to carry out the research work at the University of Saugar.
